REVISI

Assalamualaikum Warohmatullohi Wabarokaatuh,

Regards prosperous for We all,

Let us give thanks to the presence of Almighty God who has bestowed grace and blessings and His instructions so that the Guidebook for Implementing Research and Community Service people Edition XIII Revision Year 2021 This has resolved.

Referring to Law Number 20 of 2003 concerning the National Education System, Article 20 Paragraph (2) Which mention that College Tall obliged organize Pendi- education, Research and Community Service, is also clarified by law Number 14 of 2005 article 60 which explains the obligations of lecturers to carry out educational dikan, study And devotion to public, as well as Constitution Number 12 Year 2012 about Education Tall Which explain that study in College Tall directed un- knock develop Knowledge knowledge And Technology, as well as increase well-being bro- people And Power competitive nation, And Devotion to Public is activity Civitas Academics in practicing and educating the nation's life, the Ministry of Education and Culture aware of the important role of research and community service in higher education gi And Keep going endeavor repair quality study And devotion to public. Pen- arrangement Book Guide This held as Wrong One effort Directorate General Education Higher Education, Research and Technology (Ditjen Diktristek) in order to achieve national research standards tian and community service in Indonesian higher education as stated in Regulation Minister Research, Technology, And Education Tall Number 44 Year 2015 about National Higher Education Standards updated with Minister of Education Regulations and Culture Number 3 Year 2020 about Standard National Education Tall. Book Guide This arranged along with development regulations related with implementation study And peng- devotion to public For PTN And PTS in Indonesia.

Funding Study And Devotion to Public This use budget fund Tire- master of State University Operations (BOPTN) in accordance with the Regulation of the Minister of Research, Technology, And Education Tall Number 6 Year 2018 about Help Operational College Tall Negeri Which updated through Regulation Minister Research, Technology, And Education Tall Number 12 2019 concerning Operational Assistance for State Universities. The funding in question is provided by destroy it for lecturer Which is at in lower Ministry Education, Culture, Research, And Te- technology (Kemdikbudristek), while lecturers or researchers outside the Kemdikbudristek institution can participate as a member or research partner. Standard based research costs output is regulated by referring to the Regulation of the Minister of Finance of the Republic of Indonesia concerning Standard Cost Output year Which applies. Funding based outer expected lecturer can more motivated to meet the promised output targets. On the other hand, lecturers are also more spur For optimizing productivity outer study with target outer add-han.

Referring to President Joko Widodo's direction regarding the focus of developing Indonesian research towards the pan, this guidebook also accommodates research focus related *to green econo- my, Blue economy, Digital economy* , tourist And health. *Green economy* related with climate change and energy structure where the concept is used as a basis for developing gan renewable energy towards energy efficiency and is expected to be able to mitigate the impacts bad from change climate consequence use material burn fossil. *Blue economist y* related with The maritime economy is the greatest asset of the Indonesian nation, so innovation is needed in enhancement utilization potency maritime national specifically for public in

area coast. *Digital economy* or economy based technology computing digital Which covers transformation digital, development *artificial intelligence* until *software engineering* , is concepts that will change the way humans live including industrial mechanisms, government, And managerial in a way general. Tourist as Wrong One sector Which affected consequence there's- yes pandemic Covid-19 expected quick rise To use push growth economy Because Indonesia's tourism potential has not been optimally developed. Meanwhile, the focus of research on Health Health is considered increasingly important with the Covid-19 pandemic, so research in educationall can push development vaccine, biotech, until therapy genetic in Indonesia.

This guidebook also provides research directions following focus areas, themes and topics research contained in Presidential Regulation Number 38 of 2018 concerning Master Plans Research \_ National T year 201 7 - 204 5 . By more explicit, book guide This accept accommodation \_ *Gender Equity and Social Inclusion* (GESI) and Local Wisdom issues by adding themes and relevant topics for each of these focus areas. The scope of local wisdom birth in various form culture ethnic in Indonesia, No only covers values and norms, but also includes local knowledge and technology systems that can overcome the problem of inability to adapt to global challenges. Therefore That, exploration wisdom local appropriately No only done by para scientist social And hu- minora just, but Also can done by para scientist from field other.

Strategy Which done by DG Diktiristek is with give authority Which more- yuck wide in management study to college tall through program decentralization pe- research And devotion to public, whereas For issues national accommodated through program competitive national. Temporary That, For issues Which seen strategic DG Higher Education- research and technology can give assignment to College Tall Which have competence Which high level in the relevant field through an assignment program. Any research proposal Which funded must target achievements Level Readiness Technology (TKT). With summed up- pun data TKT every activity research, will makes it easier mapping its potential to direction downstream And commercialization results research. Besides That use Sinta as media gauge productivity research and service are also optimized by using Sinta ID to access fundingthrough Simlitabmas.

On its publication Book Guide This we convey saying accept love And award Which highest level to all members of the drafting team as well as the parties who played a role in it The contributions that have been made range from initiating and compiling to implementing Bitan. We realize that book guide This Still Far from perfect, so that we mem- invite the public to provide suggestions and input for improvement in the future. Finally, we would like to thank all readers for their attention. Hopefully This guide can provide benefits to advance the Indonesian nation and the world of education. dikan We on specifically.

Wassalamu'alaikum Warohmatulloohi Wabarokaatuh

# PIG INTRODUCTION

## Pendahuluan

College tall obliged organize education, study, And devotion head- and society as mandated in Law Number 20 of 2003 regarding pliers Education National Chapter 20. Study in college tall directed For expand- improve science and technology, as well as improve community welfare and energy competitive nation like explained in Constitution Number 12 Year 2012 about Education Tall Chapter 45 And 46. Study as meant, done by civitas academics And held based on track competence And competition. Results study must disseminated with method seminar, published, and/or patented. Results study in level per-teacher tall expected beneficial For:

1 enrichment knowledge knowledge And technology as well as learning;

2 enhancement quality college tall And progress civilization nation;

3 enhancement independence, progress, And Power competitive nation;

4 meeting strategic needs development national; And

5 change public Indonesia become public based knowledge.

In Law Number 11 of 2019 concerning the National System of Science and Technology Technology has been emphasized that universities are tasked with carrying out science and technology through education And carry out its function prepare source Power man For organizer- raan science and technology, And responsible answer increase ability tridharma college tall. Per- teacher tall Also own role strategic in strengthen position SCIENCE AND TECHNOLOGY as capital investment period short, period intermediate, And period long development national.

Wrong One objective System National SCIENCE AND TECHNOLOGY is increase independence And Power competitive bang- sa Which meaningful that college tall Which supported by institution R&D (LPNK, LPK, And Business Entities) and skilled higher education personnel so they can contribute in strengthening the economy and improving community welfare. College must more encouraged and facilitated to produce more inventions and innovations Which produce downstream technology appropriate To use, create mark plus, as well as increase- increase the production and use of domestic components to reduce dependence onadap product import.

So that the above mandate can be carried out well, research and service must be carried out to public in college tall must directed For reach objective And standard ter- Of course. By general objective study in college tall is:

1 produce research in accordance with Minister of Education Regulations and Culture No. 3 Year 2020 about Standard National Education Tall;

2 ensure development study superior Specific;

3 increase capacity study;

4 achieve and improve quality according to targets and relevance results study for public Indonesia; And

5 increase dissemination results study And protection richesintellectual in a way national And international.

Every university is expected to be able to manage research that meets certain standards has explained in Regulation Minister Education And Culture No. 3 Year 2020 about The National Higher Education Standards are related to the scope and explanation of the National Standards onal Study as following.

1. **Research result standards** are the minimum criteria regarding the quality of research results. Results study directed For develop knowledge knowledge And technology, as well as increase well-being public And Power competitive nation. Results pene- Litian is all outputs produced through fulfilling activities scientific rules and methods systematically according to scientific and cultural autonomy academic. Results study Which No nature confidential, No bother and/or does not endanger the public or national interest, must be disseminated with bro method seminar, published, patented, and/or method other Which can used For convey results study to public.
2. **Research content standards** are minimum criteria which include depth and breadth of basic research and applied research material. Human-oriented basic research tation on outer study Which form explanation or invention For dreaming-anticipation of a new symptom, phenomenon, rule, model or postulate. Recent research Pan is oriented towards research outputs in the form of innovation and development science and technology that benefits society, business, and/or industry. Basic and applied research includes special study material for knock interest national, Which must load principles usefulness, then- cleansing, And anticipate need period coming.

3. **Standard process study**, is criteria minimum Which includes: a) activity pene- research consisting of planning, implementation and reporting; b) fulfill the rules And method scientific in a way systematic in accordance with autonomy science And culture aka- demik; and c) consider quality standards, work safety, health, welfare manan, as well as security researcher, public, And environment.
4. **Standard evaluation study**, is criteria minimum evaluation to process And results study, Where evaluation a) done in a way integrated with principle evaluation most A little educative, objective, accountable, And transparent Which is assessment whose procedures and assessment results can be accessed by all stakeholders interest; b) must pay attention to conformity with output standards, content standards, etc research process standards; and c) using relevant methods and instruments, accountable, And can represent size achievement performance process And achievement ki- performance results study with refers provision And regulation in college tall.
5. **Researcher standards** are the minimum criteria for researchers which include: a) ability to research For carry out study; b) ability level mastery method pe- research that is appropriate to the scientific field, research object, and level of complexity and the level of research depth determined based on academic qualifications and research results; and c) determine the authority to carry out research on him- tour in the detailed guidelines issued by the Directorate General of Higher Education, Research, And Technology.
6. **Standards for research facilities and infrastructure** are the minimum criteria means and infrastructure Which required For support need fill And process study in frame fulfil results study. Means And infrastructure is facility teacher- high an used to facilitate research is least associated with field knowledge program studies as well as can utilized Also For process learning and community service activities. Facilities and infrastructure must be adequate quality standards, work safety, health, comfort and security of researchers, public, And environment.
7. **Research management standards** are minimum criteria regarding planning, implementation, control, monitoring and evaluation, as well as reporting of research activities litian. Management study as intended held by units Work da- in the form of institutions tasked with managing research such as institutions research, research institutions and community service, or other forms- yes Which kind in accordance with need And provision college tall.
8. **Standard funding And financing study**, is criteria minimum source And mechanism funding And financing study Which originate from fund researcher- internal institutions of higher education, government, collaboration with other institutions both in at home or abroad, or funds from the public. Research funding was used to finance research planning, research implementation, research control litian, monitoring And evaluation study, reporting results study, And dissemination research result. Research management funds must be provided by universities and used to finance research management (selection of proposals, monitoring and evaluation, research reporting, and dissemination of research results), increasing capacity researcher sity, and scientific publication incentives or Intellectual Property (IP) incentives. Per- teacher tall No justified For take fees from para researcher.

Devotion to public in college tall is activity civitas academics in practice And civilize knowledge, knowledge, technology For advance welfare- aan general And enlighten life nation like Which explained in Constitution Number 12 Year 2012 about Education Tall Chapter 47 And 48. Objective devotion to bro-people in college tall is:

- 1  carry out devotion to public Which in accordance with Minister of Education and Culture Regulation no. 3 of 2020 about Standard National Education Tall;
- 2  develop model empowerment public;
- 3  increase capacity devotion to public;
- 4  provide solutions based on top academic studies needs, challenges, or problems faced public, Good in a way direct nor No direct;
- 5  carry out activities that can empower the community on all level, in a way economy, political, social, And culture; And
- 6  transfer technology, science and art to society For development dignity man fair gender And inclusion social as well as sustainability source Power natural.

As with conducting research, each university is expected to be able to manage it community service based on the Regulation of the Minister of Education and Culture No. 3 2020 concerning National Higher Education Standards related to the scope and implementation explanation Standard National Devotion to Public as following:

1. **Standards for the results of community service** are the minimum criteria results devotion to public in apply, practice, And mem- cultivate it knowledge knowledge And technology To use advance well-being general and enlighten the nation's life. The results of community service can be in the form of solving problems faced by society by utilizing skill civitas academic Which relevant, utilization technology appropriate To use, material development of science and technology or teaching materials or learning modulesthank you For enrichment source Study.

2. **The content standards for community service** are the minimum criteria regarding depth and breadth of material devoted to public. Which refers to standard results of devotion to public. Depth and breadth of material developed from results of study or development of knowledge and technology in accordance with need of public, which includes the results of research or development of science and technology that can be directly applied and needed by the user community, development of knowledge and technology in a frame empowering public, technology appropriate to use which can be utilized in a frame to increase level of life and community welfare, problem solving models, social engineering, and/or recommendation policy which can be applied directly by public, world business, industry, and/or Government, as well as applicable Intellectual Property (IP). direct by public, world business, and/or industry.
3. **Community service process standards** are the minimum criteria for planning activity devoted to public which consists of planning, inevitably activities, and reporting activities. Community service activities can be done in the form of services to the community, application of science and technology according to their field of expertise, increasing community capacity; or community empowerment. Community service must be taken into consideration standard quality, ensure safety, work, health, comfort, as well as security of an executor, public, and environment. Activity devoted to public carried out by students as a form of learning must be done leads to the fulfillment of graduate learning outcomes and fulfills the requirements and regulation in college. Activity devoted to public must be held in a way directed, measurable, and programmed.
4. **Standard evaluation of devotion to public**, is the minimum criteria for assessment of the process and results of community service. Process assessment and results of devotion to public done in a way integrated with principle of assessment from at least an educational, objective, accountable and transparent perspective, as well as must pay attention to conformity with output standards, content standards and standards of community service process. Minimum criteria for assessing service results to the community including the level of community satisfaction, the occurrence of change in attitudes, knowledge and skills in society in accordance with the targets of programs, can be utilized to increase knowledge and technology in public in a way sustainable, creation of enrichment source of study and/or learning as well as maturation of the academic community as a result of the development of science and technology, as well as the resolution of social problems and possible policy recommendations utilized by holder of interest. Evaluation can be done with to-use method and instrument which is relevant, accountable, and can represent size of achievement of process performance and achievement of performance as a result of service to the community people.
5. **Standards for implementing community service** are the minimum criteria for ability of executor. For carry out devotion to public, between-implementers are required to have mastery of appropriate scientific application methods with areas of expertise, types of activities, as well as the level of complexity and depth of the activity which is determined based on qualification academic and results of devotion to public. Ability of executor devoted to public must be authorized to carry out devotion to public which is arranged in detailed guidelines issued by the Directorate General of Higher Education, Research, and Technology.

6. **Standards of facilities and infrastructure for community service** are the criteria minimum about means and infrastructure which required for support process community service in order to fulfill the results of service to community in higher education to facilitate service to community related to the application of the field of science of the study program managed by universities and target areas of activity. Facilities and infrastructure for community service is a tool that universities utilize also for process learning and activity study as well as must fulfill booth-dar quality, safety work, health, comfort, and security.
7. **Standard management devotion to public**, is criteria minimum about planning, implementation, control, monitoring and evaluation, as well as reporting activity devotion to public which held by units ker-ja in the form of an institution tasked with managing service to public with form institution devotion to public, or institution study and devotion to public, or form other which kind se- in accordance with the needs and provisions of the university. Community Service Institution the community is obliged to a) prepare and develop a program plan community service in accordance with the community service strategic plan yes public college tall; b) compile and develop regulation, pan- Duan, and system guarantee quality internal activity devotion to public; c) facilitate the implementation of community service activities; d) carry out there monitoring, evaluation implementation, and dissemination results devotion head- and society; e) giving awards to those who carry out their service public which achievement, f) utilize means and infrastructure devotion to public on institution other through work the same; g) do analysis to- need which concerning amount, type, and specification means and infrastructure peng- devotion to public; as well as h) compile and convey report activity devotion on public which managed to base data education tall.
8. **Standard funding and financing devotion to public**, is criteria minimum source and mechanism funding and financing devotion to public through fund internal college tall, funding government, work the same with institution other, good in in nor in outside country, or fund from public. Funding used for finance planning, implementation, control, monitoring and evaluation, reporting, and service results to public. Mechanism funding and financing peng- devotion to public which must arranged based on keten- Sir in college tall. College tall must provide fund management including enhancement capacity executor- na devotion to public. College tall No justified for take fees from executor ab- dian to public.

So that objective And standard study And devotion to public in college tall can achieved, Directorate General Education Tall, Research, And Technology, cq Directorate Research, Technologi, and Community Service (DRTPM) encourages and facilitates lecturers and lam carries out research and community service activities to support enhancement quality education tall, Power competitive nation, And well-being people in a way terpro- grams and sustainable. Research and community service program at DRTPM covers field knowledge as loaded in Attachment 1.

Besides develop various program study And devotion to public directly to universities, DRTPM also continues to build collaborations with various partner institutions, both at national and international levels. At the national level, cooperation carried out with government institutions, such as ministries/non-ministerial, regional governments Ah, and community institutions. DRTPM also continues to develop university collaborations tall Indonesia with institution research international, association science, And institution education in various country.

Apart from the mono-year research funding program, since 1992 DRTPM has emit various program funding study period long (multi-year) Which is expected to produce output that is truly high quality and beneficial to the government. buildings and community welfare. Starting in 2011, a decentralization program was implemented that is part activity study delegated authority its management to college Ting- gi. It is hoped that this policy can further improve the research culture for lecturers as well stimulate formation groups researcher reliable in a way equally in all over teacher- an tall Indonesia. College tall Also required For develop program study excellence in order to utilize the expertise, facilities and infrastructure available in higher education in line with local, national and international development needs. Meanwhile, For answer challenge Which more wide And nature strategic, DRTPM Keep going develop program Study Competitive National Which its management done by DRTPM.

The implementation of decentralization policies has been able to foster research excellence in teacher tall. Superiority study in college tall based field focus has can dip- etch. Results mapping This used as base in giving assignment in accordance with superior areas of research owned by forming a research consortium. Research assignments to universities that have competence in strategic fields is also implemented For support policy Ministry of Education and Culture.

Policy decentralization study on in essence is delegation task And authority to- on college tall in management study so that created climate academic Which conducive For carry out activity study in a way quality, programmed And sustainable. Giving research management authority to universities will ultimately result in produce institutional independence for research in higher education in managing research transparently, accountably and objectively. To support the authority granting program management study to college tall so that walk with Good, DRTPM has dovarious effort, Which covers things following:

mapping performance study Which has classify college high into four groups, namely the Independent, Main, intermediate, And Built. Grouping This used as base ingiving authority And allocation fund study. Mapping performance research is carried out every three years, with the hope that every university will continue to strive to improve performance his research in accordance with indicator Which has set;

preparation of authority mechanisms  
management study to college tallas base  
operational;

preparation System Guarantee Quality  
Study College Tall (SPMPPT);

preparation criteria And mechanism appointment  
internal university assessors and determination  
system selection proposal; And

preparation mechanism monitoring And evaluation  
implementation study.

In line with the research program, DRTPM gives authority to universities For manage funding program devotion to public in a way more autonomy through a decentralization program in accordance with the higher education service performance cluster- gi. By considering institutional capacity and interests, universities can assigned carry out activity devotion to public.

Along with the more complex And breadth scope implementation study And ab- dian to public in college tall, start year 2012, DRTPM (moment That Directorate Research and Community Service Directorate General of Higher Education) develops an educational system management of research and community service based on information technology and communication kasi (ICT). The system is called the Research and Community Service Information System The next community is called Simlitabmas. Using Simlitabmas, the process of submission and selection of proposals, monitoring and evaluation of implementation, final report, Per- Expenditure responsibilities (SPTJB), as well as reporting the results of research and service to the community can be managed well so that transparency, efficiency and accountabilityability can guaranteed.

## CHAPTER II

# RESEARCH MANAGEMENT AND DEVOTION TO PUBLIC

## 2.1 Pendahuluan

In line with his role as facilitator, amplifier, And empowerer, Directorate Jen- deral of Higher Education, Research and Technology strives to continue to monitor research and devotion to public in college tall. Management study And ab- dian to public in college tall directed For:

realize superiority study And devotion to public in college tall;

increase Power competitive college tall in field study And devotion to public on level national And international;

increase number participation lecturer in carrying out research and service to public Which quality;

increasing research management capacity and devotion to public in college tall; And

utilize the potential of higher education sustain Power competitive nation.

## 2.2 Program Pendanaan Penelitian dan Pengabdian kepada Masyarakat

Program study Which held by DRTPM For lecturer in college Ting- gi covers 3 Scheme based on achievements TKT that is Scheme Study Base (TKT levels 1-3), Scheme Study Applied (TKT levels 4-6), And Scheme Study Manager bangan (TKT le v el 7 - 9 ) . Each s k ema study consists \_ on a number of P ro - gram as following:

### a. Scheme Study Base

#### 1. Program Study Base:

- Study Base Competitive National (PDKN)
- Study Basics of Higher Education Excellence High (PDUPT)
- Study Base Partnership (PDK)

2. **Program Study Coaching:**
  - Study Lecturer Beginner (PDP)
  - Study Cooperation between College Tall (PKPT)
3. **Program Study Postgraduate (PPS):**
  - Study Thesis Masters (PTM)
  - Study Dissertation Doctor (PDD)
  - Study Education Masters going to Doctor For Bachelor Superior (PMDSU)
4. **Program Study Policy Strategic (KKS)**

**b. Scheme Study Applied**

- Study Applied Competitive National (PTKN)
- Study Applied Superior College Tall (PTUPT)

**c. Scheme Study Development**

- Study Development (PP)

Authority proposal study held based on on cluster collegetall like Which can seen on Table 2.1.

**Table 2. 1 Proposal Study Based on Cluster College Tall**

Community Service Program organized by DRTPM for lecturers at teacher tall covers Scheme And Program Devotion to Public as following:

### a. Scheme Sociability

1. Program Partnership Public (PKM)
2. Program Partnership Public Stimulus (PKMS)
3. Program Studying Work Real Learning And Empowerment Public (KKN-PPM)
4. Program Development Community Science and Technology (PPIM)

### b. Scheme Regionality

1. Program Development Village Partner (PPDM)
2. Program Empowerment Public Superior College Tall (PPMUPT)
3. Program Partnership Region (PKW)
4. Program Partnership Development Regionality (PKPK)

## c. Scheme Entrepreneurship

1. Program Development Entrepreneurship (PPK)
2. Program Development Product Superior Area (PPPUD)
3. Program Development Business Product Intellectual Campus (PPUPIK)

Authority management And proposal devotion to public based on clustercollege tall arranged as on Table 2.2.

**Table 2. 2**

## 2.3. Ketentuan Umum

Implementation of research and community service programs must refer to on standards for quality assurance of research and community service in higher education in accordance with established signs. With respect to matter the, DRTPM set provision general implementation program study And devotion to public Which outlined as following.

- a. Chairman researcher/executor devotion is lecturer still college tall in lower Ministry Education, Culture, Research, And Technology Which have Number Parent Lecturer National (NIDN) or Number Parent Lecturer Special (NIDK).
- b. Research members/service implementers are lecturers who have NIDN or NIDK and/or No lecturer.
- c. Proposals are made through Simlitabmas (<http://simlitabmas.kemdikbud.go.id>) and must obtain approval from the Head of the Research and Service Institute dian to the Community (LPPM), Research Institute, Community Service Institute Society or other similar designation where the lecturer serves aslecturer still.
- d. Each lecturer can propose two research proposals (one proposal as chairman and one proposal as a member or two proposals as a member) and two proposals community service (one proposal as chairman and one proposal as member or two proposal as member).
- e. Proposers who have an h- *Index*  $\geq 3$  for the social-humanities field with a minimum 3 article as writer First or correspondence on *databases* reputable; And h- *Index*  $\geq 5$  for the science-technology field with a minimum of 5 articles as author first or correspondence on a reputable *database* , can submit a proposal study until No more from four proposal (two as chairman And two as member; or One as chairman And three as member; or four as an-members); or
- f. Proposer Which own 1 patent granted and/or 5 patent registered Good For field social-humanities and science-technology fields, can submit research proposals tian until No more from four proposal (two as chairman And two as member- ta; or One as chairman And three as member; or four as member);or
- g. Applicants who have works of monumental art/performing art in accordance with Minister of Research, Technology and Higher Education Regulation Number 20 of 2017 (point 7) or work monumental other can submit proposal study until No more than four proposals (two as chairman and two as members; or one like chairman And three as member; or four as member); or
- h. Proposers who have academic texts for Laws or Regulations Area (Regional Regulation) or script urgency For Regulation Government And Regulation Pres- ideas that have been discussed by government stakeholders prove it with letter sign accept from holder interest, can submit proposal study until No more from four proposal (two as chairman And two

as member; or One as chairman And three as member; or four as member).

- i. Especially for Postgraduate Research, the applicant can submit the most five proposals as either chairman or member do not include the provisions of point e until h.
- j. If research or service is stopped prematurely due to negligence researcher/executor devotion or proven obtain funding double or re-proposing research or service that has been previously funded In general, the head of the researcher/executor of the service is not permitted propose research or service whose funding source is from DRTPM for two consecutive years and are required to return the funds that have been received/accepted to cash country.
- k. Institute for Research and Community Service (LPPM), Research Institute, Institution Devotion to Public or designation other Which kind diwa- oblige For supervision (monitoring And evaluation) internal on all research and community service activities at each PT with- bro refers to system guarantee quality Which applies.
- l. Researchers and service implementers are required to keep daily notes carry out study or devotion to public. Notes Daily ber- fill in notes regarding the implementation of research or community service according to the stages of the research process or community service. Daily notes are filled in to Simlitabmas as part of the completeness of the document implementation study or devotion to public. Researcher And executor Community service is also required to create a Logbook. Logbook with fill in detailed notes about the substance of the research or community service which includes materials, data, methods, analysis, results, etc. that are considered important ing. Logbook saved by researcher or executor devotion to public Which can made proof in submission KI.
- m. Researchers or service implementers who fail to meet appropriate outcomes with target scheme can charged penalty.
- n. Accountability fund study refers on provision SBK And SBM year budget Which applies Which set by Minister Finance.
- o. Researchers or service providers are required to include an acknowledgment mention the source of funding (namely: Directorate of Research, Technology and Community Service dian To the Community, Directorate General of Higher Education, Research and Technology gi, Ministry Education, Culture, Research, And Technology Republic Indonesia) in every form of research output, whether in the form of scientific publications, papers presented, nor poster.
- p. The Research and Community Service Program supports the Merdeka Be- study- Kampus Merdeka in research learning activities for students with a note that in its implementation it adapts the Independent Freedom Guidebook Independent Campus studies published by the Directorate General of Higher Education, Ministry Education And Culture.

- q. In frame enhancement capacity research/service to public And research/community service standards in higher education as well as carrying out implement the provisions in Article 54 of the Regulation of the Minister of Education and Culture Number 3 of 2020 concerning National Higher Education Standards which makes it mandatory college tall For provide fund research/service to public internally, then universities are obliged to provide management assistance funds research/community service at least 10% of research/community funds community service provided by DRTPM for all schemes and confirmed on stages agreement by LPPM.

## 2.4. Tahapan Pengelolaan Penelitian

In general, the stages of research activities include announcement, proposal, lexian/appointment, determination, implementation, monitoring and evaluation, reporting, and evaluation output. Timetable all stages of these activities are delivered by DRT- PM through page <http://simlitabmas.kemdikbud.go.id>. Distribution authority every research stages based on higher education research performance groups and status its institutions arranged as on Table 2.3.

**Table 2. 3**  
**Distribution Authority in Stages Study Based on Group Performance Study College Tall**

Next, each stage of research implementation is as shown in Table 2.3 can be explained further by looking at aspects of higher education research performance, status institutional college tall, And scheme study as following:

## 241. Stage Announcement

The research management cycle begins with DRTPM announcing acceptance of the research project. It is done in a way online through Simlitabmas. Announcement reception proposal is done through Simlitabmas. Universities/Higher Education Service Institutions inform reception proposal to lecturer/researcher in scope it works each each.

## 242. Stage Proposal

Proposals are made by lecturers by accessing Simlitabmas according to authority owned by universities based on higher education research performance clusters. College tall cluster independent, main And intermediate own authority propose study competitive national And decentralization, whereas cluster built only have- like authority propose study competitive national. Details procedure intruder- lan through Simlitabmas arranged more carry on on Chapter 3.

## 243. Stage Selection/Appointment

### a. Stage Selection

The selection of proposals is carried out by a team of assessors and/or *reviewers* online via Simlitabmas. Authority selection proposal Which owned college tall based on cluster performance study college tall with provision as following:

#### 1. College Tall Cluster Independent

Selection of proposed lecturers from independent cluster universities follows provision as following:

- Independent cluster higher education institution with institutional status as Legal entity universities (PTNBH Mandiri cluster) do selection of decentralized and nationally competitive research proposals autonomously based on targets and funds allocated by DRTPM Kemdikbudristek in the form of *block grants* to each PTN- Bra cluster Independent.
- Selection proposal study PTNBH cluster Independent can done by *reviewers* internal.
- College tall (PT) cluster independent non PTNBH do selection study in a way independent For study decentralization.
- Selection of non-PTNBH PT decentralized research proposals can be carried out by *reviewer* internal.
- PT non PTNBH give recommendation proposal study decentralization Which will funded to DRTPM based on results selection.
- DRTPM selects research proposals for competitive research national Which proposed by PT non PTNBH.

## 2. College Tall Cluster Main

Selection proposal lecturer from college tall cluster main follow of course- an as following:

- College tall cluster main with status institutional as per- higher education institutions with the legal entity PTNBH (PTNBH Main cluster) carry out right selection proposal study decentralization in a way autonomous.
- Selection proposal study PTNBH can done by *reviewer* internal.
- Proposal study competitive national Which proposed by PTNBH selected by DRTPM.
- PTNBH national competitive and decentralized research funding through mechanism *blocks grants* .
- PT cluster main non PTNBH do selection proposal study desen- tralization in a way independent.
- Selection of non-PTNBH main cluster PT decentralized research proposals can done by combined *reviewer* internal And *reviewer* national.
- Non-PTNBH main cluster PTs provide recommendations for researchers' proposals tian decentralization Which worthy funded to DRTPM, based on resultselection.
- DRTPM do selection proposal study For study competitive national Which proposed by PT cluster main non PTNBH.

## 3. College Tall Cluster Intermediate

Selection of proposed lecturers from middle school cluster universities following the requirementsSir as following:

- Selection proposal study decentralization done by combined *review- er* internal And *reviewer* national (external) Which lifted by DRTPM.
- *reviewers* appointed by PT with the knowledge of DRT-PM.
- DRTPM do selection proposal study For study competitivenational.

## 4. College Tall Cluster Built

Selection proposal lecturer from college tall cluster built For study competitive national done by DRTPM.

### b. Stage Appointment

Stage appointment done For determine study And team researcher Which will be determined using an assignment mechanism. This assignment mechanism is destroy it for study Which seen strategic in accordance competence institution And team researcher with provision as following:

1. Researchers are assigned to conduct research on the basis of a written letter gasan from DRTPM.
2. Researcher convey proposal to DRTPM in accordance with assignment.
3. Research proposals with appointment mechanisms are still assessed by the Committee Evaluation and/or *Reviewers* For evaluate appropriateness magnitude budget Whichpoured in news program.
4. News program the submitted to DRTPM as base considerationdetermination.

## 244. Stage Determination

Determination proposal Which worthy For funded arranged with provision as following:

- a. Leader PTNBH cluster Independent set proposal study decentralization And competitive national Which will funded, based on results selection.
- b. DRTPM set proposal study as following:
  1. study decentralization PT cluster Independent And Main non PTNBH;
  2. PTNBH cluster Main based on recommendation committee evaluator and/or *re-viewer* ;
  3. study decentralization PT cluster Intermediate;
  4. study competitive national besides PTNBH cluster Independent.
- c. Size cost Which set is price output sub output study.
- d. Determination proposal study Which funded informed through Simlitabmas.

## 245. Stage Implementation

Stage implementation study arranged with provision as following:

- a. Implementation study started with make contract study.
- b. Contract study done after proposal study set And announcedthrough Simlitabmas by DRTPM.
- c. Signing contract study done quick after announcement pene-tapan reception proposal.

- d. The process of signing contracts and disbursing research funds is based on status higher education institutions based on financial management patterns, namely PTN- bra, PTN-BLU, PTN Satker, or PTS.
- e. Signing contract PTNBH held between Minister of Education and Culture And Leader PT.
- f. The leadership of PT PTNBH or LPPM or other names makes an assignment contract to on chairman researcher.
- g. The signing of the non-PTNBH PT contract was carried out between DRTPM and Pergu-room Tall (For PTN)/Institution Service Education Tall (For PTS).
- h. Implementation study refers on contract study.
- i. Contract Study at least containing:
  1. Official signatory contract
  2. Base creation/space scope contract
  3. Amount fund And mechanism pen-fluid fund study
  4. Period applies contract
  5. Target Outer
  6. Right And obligation
  7. Reporting study
  8. Monitoring And evaluation
  9. Change team executor And sub-station study
  10. Tax
  11. Riches Intellectual
  12. *Force majeure*
  13. Penalty
  14. Dispute

## 246. Stage Monitoring And Evaluation

Target monitoring And evaluation covers researcher And organizer study (institution), each follow provision as following;

### a. Monitoring And Evaluation Researcher

1. The implementation of research must be supervised by the PT in the form of monitoring activitiestoring And evaluation.
2. PTNBH cluster Independent do monitoring And evaluation study desen-tralization And competitive national in a way internal.
3. PT non PTNBH cluster Independent do monitoring And evaluation study decentralization in a way internal.
4. PTNBH And non PTNBH cluster Main do monitoring And evaluationstudy decentralization in a way internal.
5. Monitoring and evaluation is carried out by *reviewers* , and the implementation of each decision ul research must be monitored and evaluated by 2 certified *reviewers* orin accordance provision Which set by DRTPM.

6. Monitoring And evaluation by PT can done by *reviewer* internal.
7. *reviewers* are appointed by the Higher Education Leaders follow condition Which explained on part 2.9.
8. DRTPM do monitoring And evaluation study competitive national for PT non PTNBH cluster Independent And PTNBH besides cluster Independent.
9. Implementation monitoring And evaluation study decentralization and/or comm- The national petition for PT Madya and Binaan clusters is carried out externally withbro *reviewer* external Which lifted by DRTPM.
10. DRTPM facilitates the needs of PT *reviewers* , especially for external *reviewers* . nal for PT cluster Intermediate And Built.
11. Results monitoring And evaluation be delivered to DRTPM through Simlitabmas.

**b. Monitoring And Evaluation Institution**

1. DRTPM organizes institutional monitoring and evaluation for implementers naan study in PT cluster Independent nor Main.
2. Institutional monitoring and evaluation is carried out at PTNBH Upper Mandiri cluster implementation study decentralization And competitive national.
3. Monitoring And evaluation institution done on PT cluster Independent non PTNBHon implementation study decentralization.
4. Institutional monitoring and evaluation is carried out at PTNBH and non-PTNBH cluster Main on implementation study decentralization.
5. Institutional monitoring and evaluation activities are carried out by the monitoring team andevaluation institution Which appointed by DRTPM.
6. The Monitoring and Evaluation Assessment Form is presented in the management manual. research
7. Team monitoring And evaluation institution must report to DRTPM through Sim-litabmas.
8. DRTPM is required to provide feedback to institutions for improvement guarantee quality Which sustainable.

## 247. Stage Reporting

Researcher obliged give report progress, report end year, And reportend study follow provision as following.

- a. Chairman Team Researcher must report progress output research, And notes daily active-vita research in accordance deadline time Which determined through Simlitabmas.
- b. Chairman Team Researcher must make Report Progress And Report End Study.

- c. Chairman Team Researcher must make Letter Statement No There is Asset (For Which ti- bro There is assets)/News Program Hand it over Accept Asset (For Which own asset) follow format Which determined (format report in accordance with Guide Study Which ber-in demand).
- d. Mandiri and Utama cluster PTs are required to report their institutional research performance via Simlitabmas.

## 24.8. Stage Evaluation Results Study

Stage evaluation results study follow provision as following:

- a. Researchers are required to submit a report on research results which is the final report implementation study And outer results study other Which has promised to- on LPPM or designation other.
- b. Assessment is carried out by the Assessment Committee and/or Research Output *Reviewers* For evaluate appropriateness on implementation study based on report results pe-research And achievements outer results study other.
- c. Committee Evaluation and/or *Reviewers* Output Study give recommendation to LPPM or designation others/DRTPM form results evaluation Which consists on:
  1. percentage level success study in accordance with proposal Which promised; promised;
  2. suggestion And input related suitability budget study Which has givento results study;
  3. suggestion And input related continuity study; And
  4. recommendation For get cost outer addition.
- d. Implementation contract study Which in accordance with rule scientific And of course- a research contract cannot be declared failed. Judgment about fulfillment rule scientific contract study done based on recommendation *reviewer* wandering aran study.
- e. Results evaluation And recommendation poured in news program For be delivered to LPPM or designation others/DRTPM.

## 2.5. Pengelolaan Pengabdian Kepada Masyarakat

In general, the stages of research implementation as described above apply also in carrying out community service. Service activities to The community is managed directly by DRTPM Directorate General of Education and Technology for national competitiveness and assignments, and managed by PT for decentralization. Management of funding for dian to public follow pattern funding study, that is with hem- Higher education qualifications are based on community service performance. each college tall.

Tentative schedule of all stages of research management and community service community is presented in Table 2.4. Table 2.5 presents a summary of the proposal requirements, selection, And implementation study based on scheme funding. Table 2.6 serve-

a summary of the application requirements for each community service funding scheme public. Summary scheme funding study And devotion to public based on team executor, time, And funding served on Table 2.7 And Table 2.8. Scheme Funding, Team Executor, Time, And Funding Devotion to Sir- people served on Table 2.9.

## Information:

- \* Fees Which proposed to DRTPM minimum 60% from fund maximum Which set every scheme
- \*\* Contributions minimum in form in cash or in kind
- \*\*\* Contribution from partner target Rp. 10 million And partner disabled person fund (eg CSR/Local Government/NGO) Rp. 200 million.

## 2.6. Kewenangan Pengelolaan Penelitian dan Pengabdian kepada Masyarakat

In carry out management study And Devotion to public, need there are clear authority guidelines. This guide is needed as a reference for higher education in formulating research and service management plansto public.

### 26.1. Obligation DRTPM Directorate General Education Tall, Research, And Technology

Obligation DRTPM Directorate General Education Tall, Research, And Technology da-lam management study And Devotion to public college tallis as following:

- a. Develop and establish research and community service norms people on level national in format System Guarantee Quality Researcher- tian And Devotion to public College Tall.

- b. Develop and determine Key Performance Indicators (KPI) for Research and Devotion to public.
- c. Set allocation budget study And devotion to bro-people.
- d. Organizing national competitive research funding, research decentralization, And study assignment.
- e. Organizing competitive community service funding national, decentralization, And assignment.
- f. Compile And set procedure operational standard (POST) For implementation of research funding and community service Which held by DRTPM.
- g. Carry out monitoring and evaluation of research implementation and implementation devotion to public as arranged on part 2.2.
- h. Carry out guidance and facilitate improving the quality of research and community service to be able to compete at national level. onal And international.
- i. Carry out management complaint in level national.
- j. Compile and manage research and service *databases* to the community starting from proposals, online assessment of proposals, determining winners, monitoring and evaluation, and research performance achievements And devotion to public in accordance with indicator performance main (IKU) And indicator performance activity (IKK) Which relevant with activity pe- research and community service carried out online through <http://simlitabmas.kemdikbud.go.id>.

## 262 Obligation College Tall

The obligations of universities in managing research and community service on public covers things following:

- a. Carrying out research management and community service as arranged on part 2.2.
- b. Compile plan strategic study (strategic plan study) And devotion to the community (community service strategic plan) in the context of ka increase quality And quantity study And devotion to public.
- c. Determine research performance indicators and community service Which in accordance with IKU Which set by DRTPM.
- d. Develop guidelines for the development and management of research and devotion to public with refers on standard norm SPMPPT.
- e. Encourage the formation of groups of researchers and community service implementers on public Which Empower competitive national And international.

- f. Developing a research and community service database system community which includes research performance achievements and service to public in level college tall.
- g. Carrying out research and community service contracts between college tall And researcher/executor devotion.
- h. Report results activity to DRTPM through Simlitabmas.

263.

## Obligation Institution Service Education Tall

Obligation Institution Service Education Tall in management study AndDevotion to public in college tall covers things following:

- a. Carrying out research management and community service in accordance authority Which given by DRTPM.
- b. Representing DRTPM in research contracts and community service people with college tall private (PTS).
- c. Assist DRTPM in coordinating coaching and mon- ev research and community service for private universities that needright coaching.
- d. Carry out assignments from DRTPM to manage research schemes and devotion to public certain.

## 2.7. Indikator Kinerja Penelitian

Research control is carried out through determining key performance indicators determined nationally. Every university is required to prepare an achievement plan performance main study with refers on IKU Which be measured based results mapping performance, like stated on Table 2.10.

Table 2. 10 Indicator Performance Study

No	Type Outer		Indicator Achievements			
			TS**	TS+1	TS+2	TS+n
1	Scientific articles loaded in journal	International				
		National accredited				
		National No accredited				
2	Scientific articles published in proceedings	International				
		National				
		Local				

No	Type Outer		Indicator Achievements			
			TS**	TS+1	TS+2	TS+n
3	<i>(Keynote Speakers/Invited)</i> in meeting scientific	International				
		National				
		Local				
4	<b>Speaker key/guest</b> <i>(Visiting Lecturer)</i>	International				
5	<b>Riches Intellectual (KI)</b>	Patent				
		Patent simple				
		Right create				
		Trademark				
		Confidential trade				
		Design product industry				
		Indication geographical				
		Protection varieties plant				
		Design system locationcircuit integrated				
6	<b>Book (ISBN)</b>					
7	<b><i>Book-chapter</i> (ISBN)</b>					
8	<b>Amount of Working Funds Same Study</b>	International				
		National				
		Regional				
9	<b>Number participation lecturer*</b>					
10	<b><i>Document feasibility study</i></b>					
11	<b><i>Business plans</i></b>					
12	<b>Manuscript academic ( <i>policy briefs</i> , recommendation policy, or model policy strategic)</b>					

\* Amount lecturer Which involved in study shared total lecturer still college tall

\*\* T.S = Year Now, year beginning commencement activity, written down in a way explicit, for example 2018, TS+1 = 2019, etc.

## 2.8. Indikator Kinerja Pengabdian Kepada Masyarakat

Control activity devotion to public done through determination key performance indicators determined nationally. Every college is obliged compile plan achievement performance main devotion to public with refers to KPI which is measured based on the results of performance mapping, as stated in Ta- bell 2.11.

Table 2. 11 Indicator Performance Devotion To Public

No	Type Outer	Indicator Achievements	Year			
			TS**	TS+1	TS+2	TS+n
1	Publication in journal scientificprint or electronic	Article in Journal International				
		Article in Journal National Accredited				
		Article in Journal National No Accredited				
2	Scientific articles publishedin printed proceedings or electronic	International				
		National				
		Local				
3	Article in media print period or electronic	National				
		Local				
4	Documentati on implementat ion	Videos activity				
5	( <i>Keynote speaker/Invited</i> )in meeting scientific	International				
		National				
		Local				
6	Guest speaker ( <i>Visiting Lecturer</i> )	International

		His skills increase				
		His health increase				
		His income increase				
		The service increase				

No	Type Outer	Indicator Achievements	Year			
			TS**	TS+1	TS+2	TS+n
11	Partner Productive Economy/College Tall	His knowledge increase				
		His skills increase				
		The quality of the product increase				
		Number of products increase				
		Type the product increase				
		Capacity production increase				
		Succeed do export				
		Did it successfully marketing between Island				
		Amount asset increase				
		Amount turnover increase				
		Total power it works increase				
		Management abilities increase				
		The advantages increase				
		Income generating PT increase				
		Product certified				
		Product standardized				
		Units business body law				
Number of entrepreneurs new independent						
12	Number participation lecturer*					

\* Amount lecturer Which involved in devotion to public shared total lecturer still college tall

\*\* T.S = Year Now

Study in a way Specific Also must mention level readiness or death- bro outer Which generated in accordance Regulation Minister Research Technology, And Education Ting-gi Number 42 of 2016 concerning Measuring and Determining the Level of Technology Readiness technology And Decision Director General Strengthening Research And Development Number 603/E1.2/2016 regarding Guidelines for Indicators for the Achievement of Technology Readiness Levels as stated in- explain on Attachment 3.

## 2.9. Komite Penilaian dan/atau Reviewer Penelitian dan Pengabdian kepada Masyarakat Internal Perguruan Tinggi

Inter- \_ \_ Higher education institutions select proposals in accordance with established provisions by DRTPM. Research and Community Service assessment/ *reviewer* committee Internal universities must meet a number of requirements. *Reviewer* requirements study internal college tall intended includes:

- a. have responsibility, integrity, Honest, obey code ethics *reviewers* , And capable carry out tasks as *reviewers* ;
- b. educated doctorate;
- c. have position functional as low as possible Lector;
- d. experienced in field study at least Once two time as chairman on study scale national And or Once get study ber-scale international;
- e. experienced in scientific publications in international journals indexed with thread and/or nationally accredited rank 1/2 as main author (*first author*) or corresponding author (*corresponding author*) minimum of two titles article;
- f. experienced as speaker in seminar scientific international And or seminar scientific national; And
- g. Preference is given to those who have an h- *index* from an international indexing agency reputable, experience in writing material teach And have KI.

Condition *reviewer* Devotion to Public internal college tall includes:

- a. have responsibility, integrity, Honest, obey code ethics *reviewers* , And capable carry out tasks as *reviewers* ;
- b. doctoral degree with a functional position as low as Lector; or Masters with position functional Lector Head
- c. Experienced in the field of Community Service at least One time as chairman executor activity multi year And One time in activitytan mono year;
- d. experienced in publication scientific on journal international And or nation- al accredited as writer main (*first author*) or writer correspondence (*corresponding author*) ;
- e. experienced as speaker in seminar scientific international And or seminar scientific national; And
- f. Preference is given to those who have an h- *index* from an international indexing agency reputable, experience in writing material teach And hold KI.

Mechanism appointment *reviewer* study And devotion to public internal per-teacher tall is as following:

- a. Research and community service institutions announced this openly reception candidate *reviewer* study And devotion to public.
- b. Prospective *reviewers* register themselves or are registered by other parties with research institutions And devotion to public.
- c. Selection of prospective *reviewers* is based on the criteria mentioned above according to the field skill Which required.
- d. Institution study And devotion to public announce results selection *re- viewers* internal in a way open.
- e. Internal research and community service *reviewers are determined through* Decision of the Head of Higher Education with a one year term of office and can be renewed long in accordance with need.
- f. Universities are required to submit the names of research and service *reviewers* to the internal community to DRTPM by uploading the *reviewer appointment decree* to Simlitabmas.

## 2.10. Pembiayaan Penelitian dan Pengabdian kepada Masyarakat

Financing study refers on Regulation Minister Finance (PMK) about Booth- dar Cost Output (SBK), Which load policy unit cost For SBK Sub-Output Study. Regulation the arrange budgeting activity study with mem- consider the type, research area, and sub-outputs produced. Basically financing study consists on two financing, that is SBK Research And SBK Addition.

SBK research For scheme study through funding BOPTN consists on SBK Research Pembinaan/Capacity, SBK Research Base, SBK Research Applied, SBK Research Development, And SBK Study Actual Strategic as seen on Table 2.8. SBK Research is limit maximum cost Which can Approved For reach target outer must. SBK Research must explained follow Standard Cost Input (SBM) Which currently applies. SBK Addition is limit maximum cost Which can Approved For every outer addition.

Proposers are required to make a research budget plan (RAB) by considering refer to SBK Research. RAB justification is made based on appropriate research needs with characteristics, categories, schemes and research focus areas. RAB details contain component shopping material, collection data, analysis data, rent equipment, reporting, outer must, And outer addition.

**DIREKTORAT JENDERAL  
PENDIDIKAN TINGGI, RISET, DAN TEKNOLOGI**  
Kementerian Pendidikan, Kebudayaan, Riset, dan Teknologi

## CHAPTER III

# MANAGEMENT THROUGH SIMLITABMAS

As explained in CHAPTER II, the stages of research management and community service community includes the stages of announcement, proposal, selection/appointment, determination, implementation, monitoring and evaluation, reporting, and output assessment. Each stage is managed via <http://simlitabmas.kemdikbud.go.id>. The process of proposing, assessing, monitoring and evaluating uation, And reporting study And devotion to public through Simlitabmas explained-right as following.

## 3.1. Pengusulan Penelitian

### I. IDENTITY

#### a. Identitas Ketua Pengusul

1. NIDN/NIDK
2. Name researcher
3. Rank and Position
4. E-mail proposer
5. Stuffing *curriculum vitae* (CV) with show history data researcher- tian proposer form stuffing data publication And acquisition KI (title, je- KI name and status, as well as including the URL if any). Data history researcher in the form of a researcher ID or *link* /URL containing the record footsteps researcher Which listed in institution indexer national or in- international in a way online (Sinta, Scopus, Thompson, Google Scholar, Microsoft Academic, etc.). The researcher's track record can also be demonstrated in form online other, for example *personal webpage* .
6. Stuffing ID Sinta
7. Fill in h-Index
8. Stuffing member researcher Lecturer/Non Lecturer like stuffing 1-7 in on

#### b. Identitas usulan

- |   |  |
|---|--|
| 1. Field Knowledge  | 8. Scheme study  |
| 2. Group Macro Research   | 9. Year of proposal and length of implementation litian                                  |
| 3. Field/Research Focus Study   | 10. Proposed fees in yearwalk  |
| 4. Theme study  | 11. SBK study  |
| 5. Topic Study  | 12. Total research costs   |
| 6. Title Study  | 13. The number of students who suggest getting involved in research tian to support MBKM |
| 7. Readiness Level Status Technology (TKT) research and target Which want to achieved |  |

### c. Lembaga Pengusul

1. Name units institution proposer,
2. Mention position units.
3. Name leader
4. NIP/NIK leader

## II. SUMMARY

A research summary of no more than 500 words containing the researcher's background, objectives and stages of research methods, targeted outcomes, and description of proposed research. The summary also contains a maximum of 5 words key.

## III. BACKGROUND BEHIND

Background behind study No more from 500 say Which containing background behind And problem Which will researched, objective special, And urgency study. On ba- great This need explained description about specification special related with field focus, themes and topics for national competitive or superior fields, themes and topic For decentralization.

## IV. REVIEW REFERENCES

Literature review of no more than 1000 words stating the state of the art and road maps in the field under study. Charts and road maps made in form JPG/PNG Which Then inserted in stuffing This. Source library/reference primary Which relevant And prioritize results study on journal scientific and/or patent Which latest. Recommended use source library-ka 10 year final.

## V. METHOD

The method or way to achieve the set goals is not written down exceed 600 words. This section is equipped with a research flow diagram describes what has been done and what will be done in the future time Which proposed. Format diagram flow can form files JPG/PNG. Chart pe- research must made in a way intact with phasing Which clear, start from beginning How process And the outside, And indicator achievements Which targeted. In ba- This section must also fulfill the duties of each member of the proposer according to the stages pan study Which proposed.

## VI. OUTDOOR AND TARGET ACHIEVEMENTS

In this section, the Applicant is required to fill in the mandatory and additional outputs, target year, and status his achievements. Complete outer publication form article with mention the name of the journal and the name of the publisher intended for the output in the form book, or description product Which protected For outer KI.

## VII. PLAN BUDGET COST

The maximum research cost budget plan refers to the PMK regarding SBK Applicable Research Sub Outputs. Next the details of these costs must be refers to the applicable SBM. The size of the proposed budget depends on the scheme and focus areas of the proposed research. Cost details in proposal must load SBK study (cost This Already including cost achievement outer must And cost outer addition Which will achieved).

## VIII. TIMETABLE

Timetable study arranged based on timetable implementation study.

## IX. LIST REFERENCES

Citations are arranged and written based on a number system according to the order of use. quote, follow format Vancouver. Only References Which cited on proposal pe-research Which be included in List References.

## X. AGREEMENT OR PARTNER STATEMENT

Agreement or statement partner with format free Which has confirmed by partner with sign hand leader partner And stamp in on ma t erai Rp1 0 .000 then saved and uploaded in the form of a PDF file of no size more from 1MB.

## XI. AGREEMENT PROPOSAL

Proposal ended with confirmation delivery ( *submission* ) by pengu-sul Which furthermore done agreement ( *approval* ) by leader units (LP/LPPM or other designation). The proposer will receive confirmation from the Simlitabmas if his proposal Already get away administration And Approved by

leader units. Leader units can form team to do-right verification appropriateness administration Which intended. If assessedproposal No worthy with reason Which Enough strong for examplehappen duplication proposal, No in accordance with strategic plan PT un- for decentralization, or plagiarism of proposals, then the unit leader can No agree proposal with give alasan Which reported through Simlitabmas.

## 3.2. Pengusulan Pengabdian kepada Masyarakat

Lecturers who will submit proposals for community service activities must have an account at Simlitabmas. Next, the proposer must log in to fill in data in a way online as stages following.

### I. IDENTITY

#### a. Identitas Ketua Pengusul

1. NIDN/NIDK
2. Name executor
3. Rank and Position
4. Stuffing *curriculum vitae* (CV) with show history data the proposer must fill in publication data and obtain KI. Ri- The proposer's data route can be in the form of the proposer's ID or link/ *link* /URL containing the track record of the listed proposer in institution indexer national or international in a way during (Sinta, Scopus, Thompson, Google Scholar, Microsoft Academic, etc.). The applicant's track record can also be demonstrated and in form online other, for example *personal webpage* .
5. Stuffing ID Sinta
6. Stuffing member proposer, like stuffing 1-5 in on

#### b. Identitas usulan

1. Title devotion to public
2. Scheme devotion to public Which chosen by proposer
3. Year proposal And long devotion to public
4. Cost Which proposed in year walk
5. Total cost devotion to public
6. Target achievements outer devotion to public
7. Amount student Which proposed involved in studyFor support MBKM

#### c. Lembaga Pengusul

- |                                    |                   |
|------------------------------------|-------------------|
| 1. Name units institution proposer | 3. Name Leader    |
| 2. Mention position units          | 4. NIP/NIK leader |

## II. SUMMARY

A maximum proposal summary of 500 words containing problems, solutions and target outer Which will achieved in accordance with each scheme ab-dian to public. Summary Also load description in a way carefully And sing- cat plan activity Which proposed And written with distance One space.

## III. INTRODUCTION

Part introduction maximum 2000 say Which containing description analysis situation And problem. Complete description of the introductory section for each schemema devotion to public outlined on Simlitabmas.

## IV. SOLUTION PROBLEMS

Part This maximum consists on 1500 say Which containing description all solution Which offered For finish problem Which faced in a way systematic. Results research Which applied to partner. Description complete part solution perma-errors for each community service scheme are outlined on Simlitabmas.

## V. METHOD IMPLEMENTATION

The maximum implementation method consists of 2000 words explaining the stages or steps in implementing the solutions offered to achieve gatasi problem partner. Description complete part method implementation For each community service scheme is described in the Simlitab- sir. In this section it is mandatory to fill in a description of the forms of partner participation, expertise and task each member team devotion to public.

## VI. OUTDOOR AND TARGET ACHIEVEMENTS

In this section, the proposer is required to fill in the mandatory and additional outputs, ca- achievement, and status of achievement. Just like research outcomes, The output of community service publications in the form of articles is mandatory mention Name journal Which aimed And For outer form book must men-put Name publisher Which aimed.

## VII. BUDGET

Justification budget arranged in a way detailed in accordance with format Which direct in- fill in through Simlitabmas. Budget cost For investment to partner minimum 40% from total budget For mono year And multi year; And budget Forhonor maximum 20%.

## VIII. TIMETABLE

The community service schedule is prepared according to the contents in the proposal in Simlitabmas.

## IX. LIST REFERENCES

Citations are arranged and written based on a number system according to the order of citation, follow Vancouver format. Only the literature cited in the proposed workdian to public Which be included in List References.

## X. AGREEMENT OR PARTNER STATEMENT

Agreement or statement partner with format free Which has confirmed by partner with sign hand leader partner And stamp in on ma t erai Rp1 0 .000 is then saved and inserted in the form of a PDF file of no size more from 1MB.

## XI. DESCRIPTION SCIENCE AND TECHNOLOGY

This section contains a description of a maximum of 500 words explaining the description of science and technology will be implemented with partners, equipped with a *flowchart* of implementing science and technology, specification TTG/Science and Technology other.

## XII. MAP LOCATION

Part This containing map location partner Which be equipped with explanation distance partner with PT proposer.

## XIII. PROCESS AGREEMENT PROPOSAL

The proposal ends with confirmation of delivery ( *submission* ) by the proposer which is then approved *by* the unit leader (LPM/ LPPM or other designation). The proposer will receive confirmation from Siml- itabmas if the proposal has passed the administration and been approved by the leadership units. Leader units can form team For do verification appropriateness administration in question. If it is deemed that the proposal is not feasible for certain reasons strong enough, for example if there is duplication of proposals, it is not in accordance with PT's strategic plan for decentralization, or plagiarism proposal, so leader units can No agree proposal with give reason Which reported through Simlitabmas.

### 3.3. Penilaian

In accordance with the stages of research management and community service throughout How has outlined on Chapter 2, evaluation done on stages selection, implementation, and reporting. At the selection stage, proposals are assessed and discussion And evaluation in field. On stages implementation done pe- value monitoring And evaluation.

At the time of implementation and at the end of the implementation year, recipients of funding research and community service are required to report progress carrying out research and community service. Progress report And report end year done with access And fill in achievements lu- aran in accordance Which planned, use budget

(For Devotion to Public), file semi-nar results in Simlitabmas by chairman researcher/executor devotion. On stage This done evaluation results and assessment of follow-up proposals for multi-years. Pe- selection, implementation and reporting values refer to on Attachment 4.

# CHAPTER IV

## SCHEME STUDY

Research in higher education is expected to contribute to increasing competitiveness and national sovereignty based on science and technology, as formulated on RIRN. Because That scheme study must in line with vision Which Already formulated. Men- support instruction President Republic Indonesia so topic And theme study besides must different doman at RIRN, also prioritizing the themes of *green economy*, *blue economy*, *digital economy* , tourism, and health. The direction to strengthen these three themes is not without reason. The whole world is already moving towards a *green economy* , not only because of the need for new and renewable energy. Case- Trade agreements have included *the green economy* in them. Indonesia As a maritime country, it has enormous potential in *the blue economy* . This potential can take advantage of it , right? with Good with support study. In era re v olution indu s tri 4 .0 darling \_ Already going to 5 .0 We Also must prioritize \_ \_ development *digital e c onomy* . Efficiency in all areas of life will be achieved by using digital technology with te-pat.

The research reference policy at RIRN is accommodated in the national competitive research program, as dangkan study based superior college tall Which poured on Strategic Plan study universities are accommodated in decentralized research programs. Research program needs tian Which nature strategic for DRTPM can inviting college tall through mechanism assignment.

## 4.1. Skema Penelitian Dasar

Based on Minister of Research, Technology and Higher Education Regulation Number 42 of the Year 2016 about Measurement And Level Determination Technology Readiness, Research Basics are categorized into research that produces the basic principles of technology, for- start draft and/or application technology, until proof of concept ( *proof-of-con- cept* ) function and/or characteristics important in a way analytical And experimental. Target from this research is the production of new theories, methods or policy principles used for scientific development. Basic Research can be oriented towards yes explanation or invention (invention) To use anticipate something symptoms/phenomena, new rules, models, or postulates that support a technological process, health, agriculture, and others in order to support applied research. Research Scheme This basis can be used for collaborative research from within or abroad, including Suk *sabbatical leave program* . Overseas collaborative research can be carried out online multilateral or in form consortium.

Scheme Study Base consists on four program study, that is **Program Study Foundation, Development Research Program, Postgraduate Research Program, Ka- jian Policy Strategic**. Program study base covers Study Base Competitive National (PDKN), Basic Research for Higher Education Excellence (PDUPT), and Research Base Partnership (PDK). Program Research Breeding covers Study Lecturer Beginner (PDP) And Study Cooperation between College Tall (PKPT). Program Study Fit- undergraduate degrees include Doctoral Dissertation Research (PDD), Master's Thesis Research (PTM), and Study Education Masters Going to Doctor For Bachelor Superior (PMDSU).

## 4.1.1. Program Study Base

National Competitive Basic Research refers to RIRN, while PDUPT refers to the university research strategic plan, and PDK refers to need strategic DRTPM. Program *sabbatical leave* is something activity un- to produce scientific articles that are ready to be published in international journals reputable Which is results study together with partner in outside country and wrote the final draft of the textbook using state-of-the-art materials. Outcomes, criteria and per- conditions proposer Program Study Base arranged as following.

### a. Outer Study

Outer must PDKN, PDUPT, And PDK per year in the form of:

- One article in journal international Which indexed on databases reputable; or
- One book results study ber ISBN;

Study This Also expected can produce outeraddition in accordance Table 2.10.

### b. Criteria Study

Criteria Program Study Base follow guidelines as following:

- study nature multi year, period time study 2-3 year Andthe outside will evaluated every year;
- activity *sabbatical leave* done by chairman proposer in outside countrytogether with partner during 2-3 month;
- financing study For every the year follow provisionfunding based on field focus refers SBK Study Base;
- special For *sabbatical leave* cost mobility in outside from SBK Researcher-tian Base can submitted on proposal in accordance attachment 7; And
- special For PDK required partner with institution in outside go-room tall proposer.

### c. Condition Proposer

Condition proposer Program Study Base as following:

- The chairman of the proposer has a doctoral degree with a minimum functional position sional Assistant Expert, or educated Masters with position fung-sional at least Lector;
- chairman proposer own record footsteps publication minimum two article in reputable indexed database and/or accredited national journalranking 1-2 as writer First or *corresponding author* in-

prove it by including the URL of the article in question; or three resulting books research with ISBN as the first author published by the publisher member IKAPI/ equivalent or publisher international;

- special For PDK chairman proposer must get assignment from Kemdikbudristek.
- member proposer 1-2 person.

## 4.12 Program Study Coaching

Wrong One objective study in College Tall is increase capacity institution And lecturer in carry out study. Coaching study available but facilitated in two study, that is Study Lecturer Beginner And Researcher- tian Cooperation Between College Tall.

### a. Study Lecturer Beginner

Beginner Lecturer Research (PDP) is intended as a research activity tian in frame build And direct para researcher beginner For increase ability in carry out study And mepub- publish the results of their research in scientific journals, both national and international. international.

In line with the research decentralization policy by the Directorate General of deral Education Tall, Research, And Technology, PDP is Wrong One research scheme intended for permanent lecturers at universities tall Cluster Built. Objective, outer, criteria, And condition proposerStudy Lecturer Beginner arranged as following.

#### 1. Objective Study

Objective PDP as following:

- become a training facility for novice lecturers to develop publish the results of their research in scientific journals, both national and or one article in an international journal, or seminar proceedingsinternational; And
- initiate preparation map road his research.

#### 2. Outer Study

The mandatory output of PDP is the publication of one scientific article in a journal. accredited national rankings 1-6, or one article in an international journal national, or one article in international seminar proceedings. Pe- This research is also expected to produce additional outcomes refers Table 2.10.

### 3. Criteria Study

Criteria PDP follow provision following:

- PDP financing refers to SBK Research Development/Capacity; And
- period time study One year.

### 4. Condition Proposer

Condition proposer PDP as following:

- The chairman of the proposer has a Master's degree with a maximum of functional capacity of Expert Assistant or does not yet have a position functional Which originate from PT Cluster Building;
- member proposer 1-2 person;
- Proposing members can come from PT Madya cluster and Cluster Building;
- Proposing members are not limited to functional position levels And education; And
- proposer only can get scheme PDP as much two time as chairman.

## b. Study Cooperation Between College Tall

Currently, almost all city districts have established educational institutions. dikan tall. Condition This very encouraging Because education Ting- gi will be more easily accessible to the public. However, it can gap quality maintenance tridharma education tall.

DRTPM Directorate General of Higher Education and Technology has implemented various coaching programs aim to improve the quality of lecturers, especially in the research field. The results can be seen by the development of research centers research and leading research groups in various universities room tall in Indonesia. Group researcher, laboratory, And center pe- research the has own ability And atmosphere academic Which conducive to the development and implementation of research well. However, the quality of results achieved by most tertiary institutions anyway relatively low.

DRTPM strives to reduce the quality gap between companies high level in the field of research and as a bridge for Assisted Research to Research Superior with facilitate Work The same study between clog-pok researcher Which relatively new develop through scheme Study Ker-service Between College Tall (PKPT). Team researcher proposer (TPP) PKPT comes from the Intermediate and Assisted Higher Education cluster universities. TPP partners with universities that have research centers even groups researcher who superior (Team Partner Researcher/TPM).

It is hoped that through this collaboration the quality of TPP research can be further improved And can made as bridge For continue studies to program Dock- tor. Goals, outcomes, criteria and requirements for Intercollaborative Research proposersCollege Tall arranged as following.

1. **Objective Study**

Objective PKPT as following:

- provide a forum for TPP lecturers/research groups to can utilize the facilities, expertise, adopt and example culture study TPM;
- intertwined cooperation between TPP And TPM in managementstudy; And
- give opportunity TPP For do preparation melan- surprise studies Doctor in institution TPM.

2. **Outer Study**

Outer must PKPT per year in the form of:

- Publication of one scientific article per year in international journalsWhich indexed on databases reputable; or
- One book results study ber ISBN. Study This Also dihara- pkan can produce outer addition in accordance Table 2.10.

3. **Criteria Study**

Criteria PKPT follow provision as following:

- A research proposal is research that can be carried out fostered and developed at TPP institutions after the program study This finished;
- TPM institutions must have relevant Doctoral programs with proposal study;
- The research period is two years and an evaluation is carried out inend year First; And
- financing PKPT refers on SBK Study Base den- bro magnitude bi a y a maximum Rp6 0 .00 0 .00 0 .00

4. **Condition Proposer**

Condition proposer PKPT as following:

- The Proposing Research Team (TPP) consists of the chairman and the maximum two members from the Intermediate or Higher Education cluster Building;
- chairman TPP educated maximum Masters with position functional maximum Lector;

- TPM higher education research performance cluster entered Cluster Main or Independent;
- TPM consists on a chairman And a member, both- yes educated Doctor;
- TPM No reduce quota proposal study;
- chairman researcher TPM minimum have two publication as first author or *corresponding author* in journal ep- thread it international;
- Research proposals are made by TPP and TPM as guarantors quality study; And

### 4.1.3. Program Study Postgraduate

Postgraduate Research is research that is institution-based and can be followed by lecturers to improve the quality of research, supervision (promoter and co-promoter at master's and/or doctoral level), as well as for increasing as-competency level and scientific quality of graduates and teaching staff at institutions Postgraduate. Wrong One indicator increasing competence graduate of And power teaching at postgraduate institutions is the ability to be able to write and publish the results of their research in the form of articles in international journals with the thread it.

As published in the Circular Letter of the Director General of Higher Education 152/E/T/2012 regarding the implementation of publication obligations for graduates up to level Doctoral education is a strategic step to improve the quality of graduates. That matter emphasized with Regulation Minister Research, Technology And Education Tall No- mor 44 of 2015 concerning National Higher Education Standards as in mention in Chapter 44 Paragraph (5) Which has oblige "Results study Which No confidential, non-intrusive and/or non-harmful to the interests of bro general or national must disseminated with method seminar, dipub- licate, patented, and/or method other Which can used For welcome- provide research results to the community." Still in the contents of the ministerial regulations namely in the Eighth section regarding Research Management Standards specifically on Chapter 51 Paragraph (2) points b Wrong the only one explained that "pe- value study most A little concerning aspect enhancement amount publication scientific". As base from policy And regulation in on so DRTPM through research scheme that emphasizes research productivity and publications reputable international, acceleration solution study task end level master's and doctoral degrees, as well as further research after the doctoral degree. Efforts to improve- improve research productivity and its consequences with the publication of scientific papers in higher education is providing assistance in carrying out research for ma- graduate students. One method chosen is providing support Research funding in postgraduate programs includes Master's Thesis Research- tar (PTM), Study Dissertation Doctor (PDD), And Study Education Mastersgoing to Doctor For Bachelor Superior (PMSDU).

Along with the increasing complexity of research management and in order efficiency in increasing the quality of research management in the future, then third scheme the integrated become Study Postgraduate. Theme da- The Postgraduate Research scheme must refer to ten focus areas as on Attachment 2.

## a. Study Thesis Masters

Objective, outer, criteria, And condition proposer Study Thesis Masters arranged as following.

### 1. Objective Study

Objective PTM as following:

- produce master's graduates who are able to organize ideas, results thinking, And argument scientific or technical in a way ber- not quite enough answer And based on ethics academic, as well as to- communicate through the media to the academic community mic And public wide;
- increasing the number and quality of scientific publications at both levels national nor international;
- speed up solution studies master so that can increase amount And competence graduate of program magical-tar; And
- increase the educational strata of human resources so that they have power competition and opportunities to pursue a career in the academic field or- even researcher.

### 2. Outer Study

The mandatory output of PTM is one article published in a journal accredited national scientific ranking 1-2 or one article in the journal nal international or One article on proceedings seminar internal- reputable indexed sional as a student's first author Which guided And chairman researcher as *corresponding author* . Study This Also expected can produce outer add- han in accordance Table 2.10.

### 3. Criteria Study

Criteria PTM follow provision as following:

- Research proposals are part of the research umbrella supervisor as research material for master students guidance proposer;
- student master intended on points First is ma- student Which currently studies in college tall chairman pengu-sul; And
- period time study during 1 year with magnitude cost maximum Rp3 0 .00 0 .00 0 .00

## 4. Condition Proposer

Condition proposer PTM as following:

- the chairman of the proposer is a permanent lecturer at the university, doctoral degree who is supervising at least one student master full time; And
- Proposing members consist of assistant supervisor lecturers (If There is) And One student master his guidance.

## b. Study Dissertation Doctor

Objective, outer, criteria, And condition proposer Study Dissertation Doctor arranged as following.

## 1. Objective Study

Objective PDD as following:

- produce doctoral graduates who are able to find or develop new scientific theories/conceptions/ideas, contribute to development, as well as practice science and/or technology that pays attention And apply mark humanities in field his expertise, den- bro produce study scientific based on methodology- gi scientific, thinking logical, critical, systematic, And creative, or produce graduate of doctor applied Which capable men- discover, create, and make new contributions to development, and practice of science and/or technology Which notice And apply mark hu- majors in their field of expertise, by producing works design, prototype, or innovation technology worth plus or can be used for problem solving based on thinking logical, critical, creative, And wise;
- increase amount And quality publication scientific in level international; And
- speed up solution studies doctor so that can increase amount And competence graduate of program doctor.

## 2. Outer Study

The mandatory output of PDD per year is the publication of one scientific article per year as writer First student Which guided And lead researcher as *corresponding author* in an international journal sionally reputable. This research is also expected to produce- right outer addition in accordance Table 2.10.

### 3. Criteria Study

Criteria PDD follow provision as following:

- Research proposals are part of the research umbrella as material dissertation minimum One student doctor bimb-remember proposer; And
- period time study 1-2 year with magnitude cost mom- simal Rp6 0 . 00 0 . 00 0 . 00 per year For mebi a y ai study dissertation student his guidance.

### 4. Condition Proposer

Condition proposer PDD as following:

- the chairman of the proposer is a permanent lecturer at the university, holds a doctoral degree, and has the supervision of pro- gram doctor from within and/or abroad, both programs *doctor by course* nor *doctor by research* ;
- chairman proposer own minimum two article in journal internal- sional reputable as writer First or *corresponding author* ; And
- Team members consist of a co-promoter and one student. student doctor his guidance.

## c. Study Education Masters going to Doctor For Bachelor Superior

Objective, outer, criteria, And condition proposer study PMDSU arranged as following.

### 1. Objective Study

Objective PMDSU as following:

- develop superior graduates so that those concerned can finish program doctor with more fast;
- produce doctoral graduates who are able to find or develop new scientific theories/conceptions/ideas, contribute to development, as well as practice science and/or technology that pays attention And apply mark humanities in field his expertise, den- bro produces scientific research based on methodology scientific, thinking logical, critical, systematic, And creative; And
- growing postgraduate capacity as a research center tian producing technological innovation in line with advances in science and technologytext.

## 2. Outer Study

Outer must PMDSU per year form publication One article scientific in journal international reputable as writer First ma- the student being supervised and the head researcher as *corresponding author* . Study This Also expected can produce outer addition in accordance Table 2.10.

## 3. Criteria Study

Criteria PMDSU follow provision as following:

- Research proposals are part of the research umbrella as material dissertation student guidance proposer; And
- period time study 3 year with magnitude cost maxi- mall Rp6 0 .00 0 .00 0 .00 per year.

## 4. Condition Proposer

Condition proposer PMDSU follow provision as following:

- chairman proposer is promoter from student program PMDSU which is still active and has been declared to have passed the course in Semester 1, and currently studying in Semester 2 as well as will start study in year Which currently walk;
- chairman proposer own h- *index*  $\geq 2$  Which obtained from glue-reputed and reputable international indexers footsteps study Which very Good; And
- Proposing members are co-promoters and student pro- gram PMDSU, with a clear division of tasks between teams proposer Which involved as well as Approved by Which concerned.

## 4.14 Program Study Policy Strategic

Process taking policy And implementation in Ministry Education, To- culture, Research, And Technology need support study policy. Matter This is intended so that the policies taken can effectively address problems errors that exist in the dynamics of the strategic environment faced by both in- internal and external. With this background, DRTPM facilitates through Program Study Policy Strategic (KKS). Program This expected can give base academic Which strong in determination policy strategic.

Program Study Policy Strategic can form study to policy Which implemented or reviewed the policies that will be taken. Study the wise Which Already There is and/or Which Already executed expected can mem- provide a strong scientific basis for necessary improvements to be made. Study to policy Which will taken expected can give lan- dasan scientific Which strong in process, context, And substance policy. Outer, criteria, And condition proposer Program Study Policy Strategic arranged se-like following.

### a. Outer Study

Outer KKS form script academic Which can form *policy briefs* , re- policy recommendations, or strategic policy models for an action problem in accordance with field assignment.

### b. Criteria Study

Criteria KKS as following:

- DRTPM pointing And give assignment to college high as implementing the study by taking into account the tension And resource Which owned;
- DRTPM pointing a lecturer in college tall Which appointed se- like chairman team;
- chairman team Which appointed can form team Which originate from per-teacher tall other or institution in outside college tall;
- team proposer submit proposal;
- period time KKS during 1 year; And
- financing Study Policy Strategic refers on SBK Study Ak- tual Strategic.

### c. Condition Proposer

Condition proposer KKS as following:

- chairman proposer educated minimum Masters And have comm- potential in accordance with topic Which studied; And
- member proposer 2-5 person.

## 4.2. Skema Penelitian Terapan

Scheme Study Applied is study Which addressed For get- provide a solution to a problem that exists in society, industry and government. This research is a continuation of basic research to produce downstream products. sasi. Applied Research is a research model that is more directed at finding create innovation and development of science and technology that is utilized by industry and community through collaboration with its users. This research is oriented science and technology products that have been validated in a laboratory/field environment or environment Which relevant. In process measurement TKT, target Study Tera-pan will is at in level 4-6.

Applied science and technology and social humanities products resulting from research are aim to have novelty and direct relevance to the solution problems needed by society, government and industry. Product Output study applied required own benefit direct to partner user- na, by Because That testing on level use Good scale limited/lab-

oratory or area/condition real, become important For input in pros- es research. The results of applied research are encouraged to gain recognition Riches Intellectual (KI) And directed can developed to the front in research and development to become industrially produced productsmass with TKT 7- 9.

This Applied Research Scheme can be carried out for collaborative research from da- at home or abroad. Research must be carried out multilaterally or in depth the form of the consortium is clearly outlined in the product update, map road study including distribution task between team researcher And partner user- na. Partner Study And Partner User must involved in study.

The Applied Research Scheme consists of National Competitive Applied Research (PTKN) and Higher Education Leading Applied Research (PTUPT). PTKN men- refers to RIRN while PTUPT refers to the university's research strategic plan tall. Outcomes, criteria and requirements for applicants of the Applied Research Scheme are regulated as following.

### a. Outer Study

The mandatory output of PTKN and PTUPT is in the form of innovative products, which have added value. bah, and protected by KI (Patents, Simple Patents, Copyright, Protectionungan Variety Plant, Design System Location Circuit Integrated) or script policy with criteria for each output stage as follows regulated in Appendix 5 point H. This research is also expected to be able to produce outer addition in accordance Table 2.10.

### b. Criteria Study

Criteria PTKN And PTUPT follow guidelines following:

- study nature multi year, period time study 2-3 year And outer will evaluated every year; And
- Research funding follows funding provisions based on field focus refers SBK Study Applied;

### c. Condition Proposer

Condition proposer PTKN And PTUPT as following:

- chairman proposer educated Doctor with position functional minimum Expert Assistant, or Master's degree with a functional position sional minimum Lector;
- chairman proposer own record footsteps publication minimum two article in reputable indexed database and/or accredited national journal ranking 1-2 as writer First or *corresponding author* dib- prove it by including the URL of the article in question; or three books Research results with ISBN as the first author are published by publisher member IKAPI/ equivalent or publisher international; or minimum own One KI (patent/ patent simple minimum registered And other certified);

- KI Which intended points second is KI Which protect substance Ha- results study However No including Right Create book No results research, articles, reports, theses, theses, dissertations, guides, and do- kumen the like;
- have a partner as proven by a statement of need will product Which will generated And support ( *inkind* or *cash* ) which contains willingness to be a user of research results. There is Funding support from partners is an added value to the proposal. In- The partner institutions in question are potential user partners who are relevant.vans with product study; And
- 2-3 proposing members and a minimum of 1 proposing member from partner. Member proposer Which originate from partner candidate userproven with letter appointment from partner candidate user.

### 4.3. Skema Penelitian Pengembangan

Indonesia Empower competitive And sovereign based knowledge knowledge And technology is vision plan parent research national (RIRN) Where Wrong One strategy un- knock reach vision That is “increasing contribution research to growth- han national economy”. Economic growth is influenced by exports and imports. Indonesia still imports a lot of final products and exports raw materials. Apart from that, Indonesia still imports a lot of technology products. Because it encourages research that produces commercial products such as right matter Which very important. No all study Can end to commercial- ization, but most of the research results can be directly applied to the public. people in context devotion.

Universities (PT) and industry must form a collaborative innovation system PT- industry, so partnerships with industry are really needed to support the commercialization of research results. The knowledge value created by PT can be applied effectively to improve innovation performance. When Which The same, industry can reduce cost R&D through cooperation research with PT. On the other hand, Industry contributes to research inspiration from a company perspective sahaan, Which can promote achievement study scientific in PT, with thereby can push growth economy And Power competitive nation.

PTKN/PTUPT research results that have been funded in previous periods Generally, there are several that have the potential to be commercialized through schemes PP. Inputs For PP This naturally No only from PTKN/PTUPT Which funded by Directorate General of Education Tall, Research, and Technology (Directorate General of Higher Education and Technology), but also other funded research that produces products Ready For commercialized. Scheme This expected can produce product worthy industry And own potency commercialization.

This research is directed at increasing the productivity of product commercialization research results protected by Intellectual Property. In this research it is necessary to right involvement partner industry as investors And member researcher. In pros- ice measurement Kindergarten T , target study development is at in le v el TKT 7 - 9 . PP can done For study cooperation from in or outside country. Study

Foreign cooperation can be carried out multilaterally or in the form of consortium. Objectives, outcomes, criteria and requirements for Development Research proposers-bro arranged as following.

### a. Objective Study

Objective Study Development as following:

- produce product knowledge knowledge, technology, art, And culture;
- realize map road technology or results research Which nature mul-undisciplined Which produce product commercial;
- build partnerships *Academic, Business, Government, and Com-munity (ABGC)*; And
- increase And push ability researcher in college Ting- gi to collaborate with partner institutions in the country or in outside country.

### b. Outer Study

Outer must Study Development can form product industry or product policy with criteria each stages outer every ta-hun arranged as following:

- the first year in the form of an industrially viable prototype trial document inenvironment limited
- the second year in the form of an industrially viable prototype trial document in environment Actually
- year third form document *feasibility study And business plans*

Detailed output per year can be seen in Appendix 5 point I. This research is also expected to produce additional appropriate outcomes Table 2.10.

### c. Criteria Study

Criteria Study Development as following:

- study nature multi year, period time study 3 year;
- outer form product science and technology will evaluated every year; And
- Research funding for each year follows the provisions funding based on focus areas refers to Research SBK Development.

## d. Condition Proposer

Condition proposer Study Development as following:

- chairman proposer educated Doctor with position functional Minimum Expert Assistant, or Master's degree with position functional minimum Lector;
- chairman proposer own record footsteps publication minimum two article in reputable indexed database as first author or *corre- The sponsoring author* is proven by including the URL of the article in the Meaning or own patent/patents simple with status registered- ar or granted or other KI that is certified with substance related proposal study;
- have investor partners as proven by a statement letter which contains a commitment to invest funds by partners in the form of *this cash* minimum as big as 10% from fund Which submitted; And
- 3-5 proposing members and a minimum of 1 proposing member from industry partners. Members who come from industry partners are proven-right with letter appointment by institution/industry.

PENDIDIKAN TINGGI, RISET, DAN TEKNOLOGI**  
Kementerian Pendidikan, Kebudayaan, Riset, dan Teknologi

## CHAPTER V

# SCHEME DEVOTION TOPUBLIC

## 5.1. Skema Kemasyarakatan

Directorate of Research, Technology and Community Service (DRTPM) Directorate General of Higher Education- Research and Technology Kemdikbudristek tries to apply a new paradigm in community service activities directed to public which nature solve problem, comprehensive, meaningful, complete, and *sustainable*. Community Schemes include the Social Welfare Program to the Public (PKM), Program Partnership Public Stimulus (PKMS), Program Labourer-ah Community Learning and Empowerment Real Work (KKN-PPM), and Programs Application Science and technology to Public (PPIM). Activity in scheme society is characteristic mono year. Objective, outer, criteria, condition, and characteristics Scheme Pack-yarakatan arranged as following.

### 5.1.1. Objective Activity

Scheme Sociability aims:

- a. forming/developing an independent group of people economy and social;
- b. helps create peace and comfort in life community;
- c. improve thinking, reading and writing skills or skills other which needed ( *soft skills* and *hard skills* );
- d. specifically for KKN-PPM : changing the implementation of the KKN-PPM program from the paradigm where development becomes an empowerment paradigm with the concept of *co-creation ation*, *co-financing* and *co-benefits* ; and downstreaming of lecturers' research results can be applied to public through program KKN-PPM;
- e. special PPIM give support, strengthening, and accompaniment execution program priority in implementation cooperation with institution neighboring/LPK/LPNK;

### 5.1.2. Outer Activity

Outer must Scheme Sociability as following:

- a. increasing the level of partner empowerment quantitatively and qualitatively according to problem which faced refer on Table 2.11.
- b. One article scientific which published through journal or ISSN or proceedings or ISBN from seminar national;
- c. One article on media mass print/electronic;
- d. videos activity;

Outer addition Scheme Sociability can form outer other in outside lu-aran must in on refers on Table 2.11.

### 5.1.3. Criteria Activity

Criteria Scheme Sociability as following:

- a. SCIENCE AND TECHNOLOGY Which applied from results study team proposer prioritized Forfunded;
- b. The community scheme is a mono-year program with a term of eight months of activity (PKM, and PPIM) 6 months (PKMS), and a maximum of 2 months lan/144 JKEM (KKN-PPM);
- c. involving at least 2 students (PKMS, PKM and PPIM), 20 people (KKN-PPM), Which his activities recognized become part from MBKM minimum 5 SKS in 1 year implementation;
- d. Problems handled by partners include at least two problem areas need expertise Which different;
- e. support transformation Education Tall through 8 Indicator Performance Main (IKU) minimum 2 indicator;
- f. distance from college tall proposer maximum 200 km, except PKMS maximum 100 km; And
- g. Budget Which used For invested to partner minimum 40% of the total proposed budget in the form of goods and capital expenditure (No including land And building construction).

### 5.1.4. Condition Proposer

Condition proposer Scheme Sociability as following:

- a. the proposer has multidisciplinary competence in accordance with the field being tested sulkan, minimum two competence, And possible For collaborate den-bro college tall other;
- b. Applicants may only implement three community schemes time as chairman; And
- c. team executor minimum two person And maximum three person (One chairman AndOne or two member).

### 5.1.5. Characteristics Program

#### a. Characteristics Program Partnership Public (PKM)

The Community Partnership Program (PKM) is an improvement program community potential. The target audience (partners) of a productive society economically such as: craftsmen's groups, fishermen's groups, groups farmer, group cattle, Which every its members own character product- tive economically. Home industry target partners (IRT) with ownership business nature individual/individuals required have

Minimum of 4 employees excluding family members. Target partners who leads on field economy productive required is clog-pok with amount member minimum 5 person, like group dasawis- ma, pokdarwis, PKK groups, recitation groups, homemaker groups mah ladder And etc. Partner target public Which No productive in a way economy for example school (PAUD, elementary school, JUNIOR HIGH SCHOOL, high school/vocational school), coral ta- runa, group moms House ladder, group children street, RT/ RW, hamlet, village, Community Health Center/Posyandu, Boarding school And other etc.

Type problem Which must handled in program PKM, specifically economically productive communities or potential new entrepreneurs include field production, management business And marketing. For activity Which does not focus on the economic field, it is mandatory to disclose detailed problems that are prioritized to be resolved such as increasing services, increasing public peace, improving/helping facility service And etc.

## b. Characteristics Program Partnership Public Stimulus (PKMS)

In line with the PT clustering policy based on service performance to the community, then DRTPM designed a special scheme in up- I encourage increased involvement of PT lecturers in the Less cluster Satisfactory or not yet have clustering in the form of a Pro- gram Community Stimulus Partnership (PKMS). PKMS scheme provides stimulation PT in cluster Not enough Satisfying For can increase performance devotion to public in college its height. Audience PKMS program targets can include: 1) a productive society economically; 2) a society that is not yet economically productive, but has a strong desire to become an entrepreneur; or 3) society that does not bro productive in a way economy (public general/ordinary).

Partner target public Which productive in a way economy like industry households (IRT), craftsmen, fishermen, farmers, livestock breeders and product partners tif other. For partner public Which Not yet productive in a way eco- e.g but desire strong become entrepreneur, required shaped groups with a minimum number of members 3 people. Community partners which are not economically productive can be schools (PAUD, SD, JUNIOR HIGH SCHOOL, high school/vocational school), coral cadets, group moms House ladder, clog- street children's groups, RT/RW, hamlet, village, Community Health Center/Posyandu, Pe-Islamic boarding school And Which kind other.

Types of problems that must be addressed in the PKMS program, especially especially economically productive people or potential new entrepreneurs covers field production, management or marketing. Whereas For non-productive partner activities can be in the form of problem handling health, blind script, or training in accordance need partner. Activity carried out at PKMS at least one area of activity but a team proposer must with minimum two expertise Which different.

### c. Characteristics Program Studying Work Real Learning And Empowerment Public (KKN-PPM)

Program Studying Work Real Learning And Empowerment Public (KKN-PPM), is a field activity for students who are studying puh the final part of the undergraduate education program. This program actually characteristic must for all student, Because program This capable push student empathy and sympathy for community problems, and can contribute to solving existing problems public. The KKN-PPM program provides opportunities for students to get learning in the field that was not possible before obtained in seat studying. Besides That activity KKN-PPM become form real contribution College Tall (PT) for public industry, government- tah regions and community groups who want to be economically independent as well as social. This KKN-PPM program requires a Supervisor Field (DPL) and students play an active role in knowing the existing problems and provide solutions to these problems in period time during 1 until 2.5 month in field with draft "Work together public" as replacement draft "Work Forpublic".

In an effort to improve the image and quality of KKN-PPM activities, then implementation KKN-PPM designed more contextual with change paradigm development become paradigm empowerment. Revitalization Studying Work Real (KKN) become Studying Work Real - Learning And Community Empowerment (KKN-PPM) for Higher Education (PT) throughout Indonesia is very important to do. This was driven by ken- true that Lots PT Which previously set eye studying KKN-PPM become eye studying must level bachelor Now only become eye choice of college and even many universities already accept center for KKN-PPM courses from the curriculum. Thus the program KKN-PPM is specifically only for PT which requires KKN-PPM for students before completing undergraduate studies, where opera design- sional and implementation methods need to be adapted to social conditions. each PT.

### d. Characteristics Program Application SCIENCE AND TECHNOLOGYto Public (PPIM)

This is an Assignment Program aimed at supporting the work of cooperation with other institutions in an effort to improve DRTPM performance in particular and government performance in general. The Ministry of Education and Culture, Research and Technology, with its various expertise, is obligation to make development successful in all fields by providing support, strengthening and mentoring in the form of cooperation implementation of priority programs implemented by the institution country/LPK/LPNK, especially programs that relate to the needs han public.

Audience target (partner) PPIM can form group business public (such as Bumdes or other village business units), cooperatives, and groups business economy productive Which formed by institution country/LPK/LPNK. Partners from general community groups such as youth organizations, *dasa wis- ma*, *pokdarwis*, and other general community groups in village. Partners are determined by at least two groups of the general public, or two groups of economically productive society; or a group of people general And One group public economy productive.

Implementation of the PPIM scheme is carried out by referring to the results PT performance assessment by looking at the achievements of all aspects of the Standards National Community Service. Performance assessment analysis results- ja This, mainly competence college tall For carry out task downstream Science and technology to public, can used as reference Forgive assignment implementation devotion to public.

## 5.2. Skema Kewilayahan

Empowerment public based territoriality is activity multi year (3 ta- hun) which is aimed at helping various regional problems faced by but by regional/city government, village/village (another name with the same governance), Subdistricts, traditional villages, in accordance with RPJM or Non-RPJM, both *Bottom Up* or *Top Down* in order to improve the quality of life for the general public, education, health, business and industrial communities found in fruit region Which become location built College Tall (PT). Forms activity This regionally based program is nationally competitive, namely PKW (Mi- Regional Traan), PPDM (Partner Village Development Program), PKPK (Partnership Program Regional Development), and superior PT-based regional programs, namely PPMUPT (Leading Higher Education Community Empowerment Program). Goals, lu- aran, criteria, condition, And characteristics Scheme Regionality arranged as following.

### 5.2.1. Objective Activity

Scheme Regionality aims:

- a. apply results research superior college tall Which in accordance with ur- prestige need public on region built;
- b. provide solutions to partner problems with a holistic, based approach research multidisciplinary;
- c. assist government programs in community and human development regional errors, as well as helping to ensure successful implementation of the program RPJM Village;
- d. increasing the independence and welfare of the general public, society Which move in field economy (IRT, SME/UMKM, And group business other), Education, health, environment, etc in accordance need region;
- e. strengthening the synergy of higher education institutions (PT) with stakeholders related in development regionalism; And
- f. form *science-techno-park* college tall based region.

## 522 Outer Activity

Outer Must Scheme Regionality is :

- a. enhancement levels empowerment partner Which refer on Table 2.11.
- b. produce at least one product that has KI (copyright, patent and patent). simple) (on th to 3);
- c. produced one scientific article published in a national journal indexed Sinta minimum ranking 4 or One article in Proceedings indexed Scopus from seminar international Which held in a way online or do- there in in country, or One journal International indexed Copernicus/equivalent (on th to 2);
- d. videos activity (every year); And
- e. article in Media mass print/electronic (every year)

Outer addition can form outer other in outside outer must in on admit-cu on Table 2.11.

## 523. Criteria Activity

Criteria Scheme Regionality as following:

- a. Activity nature multi year (3 year);
- b. proposal fund k e D R TPM maximum Rp15 0 .00 0 .000 per year ( except \_ Maximum PKPK Rp20 0 .00 0 .00 0 );
- c. Need it \_ sharing fund minimum Rp1 0 .00 0 .000 ( for PPDM) from go - room tall, Rp10 0 .00 0 .000 ( for PKW ) , And Rp20 0 .00 0 .000 ( for PKPK) which can originate from Local Government/CSR/NGOs And source other;
- d. Budget Which used For invested to partner minimum 40% from total budget Which submitted in form shopping goods And capital (ti- bro including land And building construction); And
- e. Distance location Village Partner from College Tall proposer maximum 200 km or can more from 200 km provided Still in One province, except PKW can cross province through partnership with PT local with budget Pem- da/City Government/CSR Which rational.

## 524. Condition Proposer

Condition proposer Scheme Regionality includes:

- a. team proposer amount minimum three person And maximum four person (One chairman with two or three members); especially PKW to get involved minimum One person team from PT partner;

- b. the proposing team has the appropriate capabilities (scientific track record).with activity Which proposed/problem Which handled;
- c. the proposing team must involve a minimum of five students/year; And provide recognition for a minimum of 5 credits per year of activity to students;And
- d. the proposing team was formed by the institution on the recommendation of the Chair of the LPM/LPPM/P3M/ DPPM where each university may nominate more than 1 team Devotion Public Scheme Regionality.

## 5.25. Characteristics Program

### a. Characteristics Program Development Village Partner (PPDM)

Development economy public Indonesia Lots happen in region per- village. So the importance of villages as assets, history, heritage and starting points development of the nation's civilization, the state has issued Laws dang Number 6 of 2014 concerning villages which are implemented with Government Regulation Number 43 of 2014 concerning Implementing Regulations Law Number 6 of 2014. As a follow-up, the government scrolling program grant development rural.

In line with the government program to accelerate the village economy that focuses on handling infrastructure, then universities must have show concern by contributing to providing reinforcement through applications science and technology, policy models, and research-based social engineering. The village's socio-economic development will be faster with its construction infrastructure And it opened access. Touch from college tall recently pa downstream results research multidisciplinary will give acceleration quality And quantity of village progress in all fields (social, economic, legal, health, culture, education, agriculture, resilience food, maritime, energy new And renewable, environmental and others) without leaving superior value or characteristic typical Which has owned village the. With thereby, will awakened The College Partner Village has certain advantages as *an icon* and the main driver of village development as well as one of the mod- El techno-science and *tourism park* . A number of example results activity PPDM ter- in the form of a Halal Food Center Village, Bamboo Craft Village, Conservation Village Rare Plants/Animals, Energy Mandiri Village, Organic Farming Center Village, Culinary Village, Tourism Village, Traditional/Arts and Culture Village, Garam Beryo Village- dium, Healthy Village, Syariah Village, Community Development Village, Bu-Card Village Daya, Nature Reserve Village, and so on. Centers in the village become *science-techno-park* college tall. So that Can made object For devotion And learning for student, lecturer And visitor in And outside country.

Through the PPDM program, the proposed village is one village that Now partner with PT/Team proposer Which proven with letter agree- juan Work The same; village Which intended in accordance with Act No. 6 Year 2014 that is traditional villages and administrative villages, not sub-districts; involving at least two community groups in Mitra Village per year, both those involved in productive economic field or social organizations, partner groups that handle it in Village Partner Which The same can change every year, And on

year second And third recommended get support funds/facilities from REGIONAL GOVERNMENT/ Service And/ or party third other;

**b. Characteristics Program Partnership Region (PKW)**

Program Partnership Region (PKW) held For give solution to various problem territoriality like field education, health, social culture, economy, tourism, infrastructure, production (agriculture, animal husbandry, fisheries, creative industries, etc.), environmental bro, village administration and government). A proposed PKW program is prepared together with related parties including: Proposing Universities, Universities Tall Partner, Regency/Municipal Government and/or CSR. There is college tall Mi- tra considered For build tradition togetherness between go- The higher room is also intended as a refinement of types of expertise required in the implementation of PKW. Partner universities can selected from universities in the PKW region. References used in preparing the PKW proposal is the RPJMD for district/municipal government and non-municipal government RPJMD in accordance with region PKW.

Regional partners in the PKW program only consist of one village or one ward, handle minimum two field problem territoriality for example field health And education or agriculture And law or agriculture- an And economy or field agriculture And tourist And etc; universities implementing PKW are required to partner with universities other gi from nearby PKW areas; The PKW program consists of various program And activity during three year Which its implementation No need consecutive, or started on year Which The same;

**c. Characteristics Program Empowerment Public Superior College Tall (PPMUPT)**

Based on Regulation Minister Research, Technology And Education Tall And Number 44 Year 2015 about Standard National Education Tall, every college tall required own plan strategic (Renstra) ab- dian to the community. This strategic plan was prepared taking into account the strength of the resources possessed by each university gi. To support the acceleration of achieving the higher education strategic plan, DRTPM designed a scheme Community Empowerment Program Higher Education Excellence (PPMUPT). Thus PPMUPT must refers to the Community Service Strategic Plan which has been dis-usun by PT.

Program Empowerment Public Superior College Tall (PPMUPT) has the same form of activity as PPDM but has partner freedom, namely being able to partner with one administrative village, or ward, whatever village custom on two group public per ta- hun to apply various superior research results of PT in helping that various problem group public in region the. In this way, a village will be built that characterizes PT's excellence at the same time as science-techno and *tourism park model* so that it can be make it object For devotion And learning for student, lecturerAnd visitor in And outside country.

d. **Characteristics Program Partnership Development Regionality (PKPK)**

Pandemic covid 19 Which Already walk more from a year result the decline of the nation's economy, where many SMEs/UKMK/Groups loss of business, causing an increase in the number of disruptions ran and a decline in the level of economic growth at both the national level, regional to international. Issues handled by the management team devotion together partner, covers all over facet business UKM/UKMK/Group Business, since from management material standard until to marketing product, supporting facilities and infrastructure to facilitate business operations SMEs/SMEs/business groups located in the area. Dis- Apart from that, there are village/customary lands which have not yet been optimally utilized. Yes, to improve the regional economy, PKPK is an option area management model that has gone through studies carried out there minimum through FGD together with government village/custom And group public manager Region the, complete with Anal-Isis Economy potency Region.

The Regional Development Partnership Program can be implemented at Villages, Subdistricts or Traditional Villages in the form of : a) Increasing pro- productivity of land, especially Ulayat land/Traditional land or community land immunity other Which owned by community public or land private- adi Which given right its management For public local in minimum period of 10 years, and b) Increased SME productivity/ UKMK/other business groups in one village/sub-district area/ custom. The minimum number of target partners is 2 SMEs/UKMK/US groups. aha.

The PKPK development model will be an integrated area managed in a way together PT with group public, on This- initiative of community groups, or by management institutions appointed by determined by the village/customary government, or UKM/UKMK entrepreneurs, and other business groups. Mapping the potential of the area really needs to be carried out be the first to prepare proposals and involve appropriate expertise. The PKPK proposal was initiated with the results of research by the proposer will be a plus point in consideration of the funding. Scope field activity in PKPK is Integration agriculture, plantations, animal husbandry, fisheries, edu-tourism/travel, UKM/UKMK, or other fields in an integrated manner in one area. College give strengthening through application science And technology, model kebi- jakan, as well as manipulation social. Downstreaming results research multidisciplinary will mem- give acceleration progress of partner areas without abandoning the value of hips or characteristic typical Which has owned area the. Potency economy is reference For compile indicator achievements ( *outcome* ) levels to- empowerment public in a way economy; like enhancement asset, turnover, community income, contribution to village/customary government, form *outcomes* other Which impact to enhancement economy Andwell-being public.

The proposed area is an area proven by a letter agreement Work The same Which signed by Village/Traditional, And owner land (if land owned by individual Which submitted right manage to

community minimum period of 10 years); The size of the managed area is there minimum 2 (two) hectare Which proven with *copy* certificate or Letter Owner's Statement and ratified by the Village Head; minimum involve 10 (ten) person public Which involved direct in activity da- lam Region. PKPK Also can partner with SMEs/SMEs , For partner UKM/UKMK/other Business Groups, minimum 2 (two) partners, and located in 1 area village/custom/sub-district.

### 5.3. Skema Kewirausahaan

Entrepreneurship-based community empowerment is a multi-year activity (3 year) Which addressed For help push ability entrepreneurship based Science and Technology produced by lecturers and students. Various forms of activities This entrepreneurial system is nationally competitive, namely PPK (Development Program entrepreneurship development), PPPUD (Regional Featured Product Development Program), PPUPIK (Campus Intellectual Product Business Development Program). Two Second Programs entrepreneurship, namely PPK and PPUPIK, is carried out on campus, while PPPUD carried out on partners outside the campus. Goals, outcomes, criteria, requirements and characteristic Scheme Entrepreneurship arranged as following.

#### 5.3.1. Objective Activity

Objective Scheme Entrepreneurship as following:

- a. increasing networking between higher education entrepreneurship and the community people industry And institution other;

- g. For PPUPIK aim support autonomy campus college tall through acquisition income independent or partner; And give chance And experience Work to student;

## 5.3.2 Outer Activity

Outer Must Scheme Entrepreneurship is :

- a. enhancement levels empowerment partner Which refer on Table 2.11.
- b. produce at least one product that has KI (copyright, patent and patent). simple)(on th to 3);
- c. produced one scientific article published in a national journal indexed Sinta minimum ranking 4 or One article in Proceedings indexed Scopus from seminar international Which held in a way online or do- there in in country, or One journal International indexed Copernicus/equivalent (on th to 2);
- d. videos activity (every year); And
- e. article in Media mass print/electronic (every year)
- f. increase *income generating* PT (special PPUPIK)

Outer addition can form outer other in outside outer must in on admit-cu on Table 2.11

## 5.3.3. Criteria Activity

Criteria Scheme Entrepreneurship includes:

- a. proposal fund k e D R TPM maximum Rp15 0 .00 0 .000 per year ( except \_ Maximum PPUPIK Rp20 0 .00 0 .00 0 );
- b. Need it \_ sharing per year fund partner minimum Rp1 0 .00 0 .000 ( for PPPU D ) , Rp2 0 .00 0 .000 ( for PPK ) , And Rp3 0 .00 0 .000 ( for PPUPIK) who can \_ originate from College tall And source other;
- c. Budget which is used to invest in PPUD partners, ma- entrepreneurial students, and PPUPIK units at least 40% of the total budget submitted in form shopping goods And capital (No including land And building construction); And
- d. Distance location Village Partner from College Tall proposer maximum 200 km or may be more than 200 km as long as it is within one province, except PPK and PPUPIK is at in the PT.

## 5.3.4. Condition Proposer

Condition proposer Scheme Entrepreneurship includes:

- a. team proposer amount minimum three person And maximum four person (One chairman with two or three person member);
- b. the proposing team has the appropriate capabilities (scientific track record).with activity Which proposed/problem Which handled;

- c. support transformation Education Tall through 8 Indicator Performance Main (IKU) minimum 2 indicator;
- d. team proposer must involve minimum five person student/year (except- li PPK minimum 20 students); and to support the MBKM program then it is mandatory to provide recognition for a minimum of 5 credits per year of activity to student.
- e. the proposing team was formed by the institution on the recommendation of the Chair of the LPM/LPPM/P3M/ DPPM Where every college tall can propose more from 1 team ske- ma Entrepreneurship (except For PPK only 1 activity per Faculty)

### 5.3.5. Characteristics Program

#### a. Characteristics Program Development Entrepreneurship (PPK)

Directorate of Research, Technology and Community Service (DRTPM) carry out something program with mission produce entrepreneur-entrepreneur- new shares from campus, through an integrated program with creative methods which is completely handed over to universities through the Program Entrepreneurship Development (PPK). Every college is eligible managing more than one PPK program. PPK may be proposed by Faculty of bag/major with involve a number lecturer Which experienced ber- entrepreneurs from various disciplines. PPK carries out training on to tenants through business management training and a number of activities creative other For produce businessman new Which independent based science and technology. Tenants must improve their skills in producing products in each study program. PPK managers are also advised to collaborate laboratories with institutions that related to development entrepreneurship, Good in in nor in outside campus, including program development of campus intellectual product businesses (PPUPIK) in universities tall each.

PPK can held in form training entrepreneurship, find- Get students to carry out internships at companies established/business units/PPUPIK in the tertiary institution and facilitating students in entrepreneurship. Training is carried out for provide entrepreneurial knowledge, encourage the growth of entrepreneurial motivation, increasing understanding of management (organization, production, finance and marketing) as well as creating a business plan or business feasibility study. Internship activities at companies/business units ha/PPUPIK held For give experience practical skill- sahaan to student with method follow Work daily on units the effort. Students who have started entrepreneurship, students Entrepreneurship Student Creativity Program (PKMK), Creativity Program- Other Student Activities (PKM), Entrepreneurial Student Program (PMW), students who are interested and are starting a business, and alumni who interested or just starting a business can perfect their activities entrepreneurship Which has done previously, For increase no need- Anya. Manager Program PPK college tall recommended For dig type commodity business para tenants Which takes priority in form product unique and superior goods/services according to talents and not only just stuck on his interest.

Units service PPK build tenants Which has selected as much 20 person during 3 (three) year. Every year must produce minimum 5 wirau- saha new independent. Selection really new held For replace a number of independent tenants, so that every year the number lah really Which built still 20 person. Tenants can nature individual or group, if in form group maximum amount its members is 3 person. From 20 person really can form maximum 4 clog- pok And the rest nature individual. Really from alumni limited maximum 5 person. Tenants may be provided with assistance in purchasing equipment or repair means production Which its nature rolling.

**b. Characteristics Program Development Product Superior Area (PPPUD)**

Product superior area is product form service And goods den- bro, uniqueness/characteristics at the village/village level, sub-district, ka-regents, and provinces, produced by micro, small and medium enterprises (UMKM) And Business Small Intermediate (SME). Potency product superior Which are found in various regions of Indonesia, making it possible to develop bang more carry on with help lecturer in college tall, through activity devotion to public in a way sustainable interrupt- ma three years in the Regional Featured Product Development Program (PPPUD).

The criteria for superior products are : a) have local content stand out and be innovative in the agricultural, creative industry and service sectors, b) has high competitiveness in the market, c) good marketing reach wide Good in in country nor global, d) have characteristic typical area And involve power Work local, e) availability material standard me-madai, f) does not damage the environment, is sustainable and non-destructive local culture. The development of superior products will also be more results when supported by role as well as government area.

PPPUD program partners are Micro, Small and Medium Enterprises/Small Enterprises Medium (UMKM/UKM), and with the following characteristics: 1) Business Already walk minimum One year; 2) Represents product/service superior area, like product based results plantation, agriculture, fishery, food processed, art show, craft, And industry creative other; 3) product/service Which own uniqueness/characteristics typical local/regional local; 4) domestic market potential or export destinations; 5) environmentally friendly bro And based culture local; 6) candidate partner amount One partner; 7) requires the application of science and technology; 8) can potentially be developed more carry on through program PPPUD; And 9) willing give contribution fund minimum Rp1 0 .00 0 .000 ( ten million rupiah h ) per year, during three year.

**c. Characteristics of Business Development Programs Product Intellectual Campus (PPUPIK)**

In connection with efforts to develop a knowledge-based economic culture knowledge, universities need to be given access in the form of *knowledge and technopark* Which utilise knowledge, education nor results

lecturer research. By organizing a Business Development Program Campus Intellectual Products (PPUPIK), universities have the opportunity to earn income and help create new entrepreneurs. Results university research which is a new innovation and has value economical and gets Intellectual Property (IP) protection such as right create or patent, is asset Which very valuable for pertum- buhan And development PPUPIK.

Program PPUPIK expected capable push college tall in build access Which produce service products and/or technology his own creation. The form of PPUPIK in higher education can be: units business, as example: center production, center consultation, center de- science, center training, center repair And maintenance, center study and development, and health care centers. PPUPIK can partners with Banks, BUMN, Regional Government, Investors and can also partner with bro, other industrial circles. PPUPIK can be managed by a group of lecturers according to their competence at the laboratory level, sample planners han, workshop, department/department, faculty/school, UPT, research center and development or other institutions within higher education the. Once established, PPUPIK is expected to continue to develop through development mastery knowledge knowledge, research, perseverance effort and foresight to seize the opportunities that exist in good society internal and external campus. The mission of the PPUPIK program is to create there will be access to socialization of superior lecturers' intellectual products and innovation in the higher education environment within the framework of fulfilling the needs Lord public Good internal nor external campus.

# CLOSING

Completion of the Research and Community Service Handbook, Edition XIII Revised Ta- 2021 will go through a continuous process. Records of research and service implementation to public with use guide edition previously become material enrichment Which very valuable in every stage its perfection. Besides endeavor in support Independent Campus Learning (MBKM) program and achievements of Key Performance Indicators (IKU) in Higher Education, Research and Community Service as regulated in the Book This guide has also accommodated the dynamic development of research directions with focus the latest research and introduce the formulation of research and service schemes to the public people Which more systematic.

Blessing effort Work hard all Team Compiler And Synchronizer Finally Book Guide Researcher-tian And Devotion to Public Edition XIII Revision Year 2021 This can resolved. For That, flavor I'm grateful proper We climb it to Lord Which Maha One on His approval Book Pan- Duan This has resolved with Good.

Book guide This is reference Which clear in implementation activity study And peng- devotion to public, specifically for para lecturer as perpetrator main activity study and community service. This guidebook also serves as a clear reference for manage activity study And devotion to public Good in college tall nor within the DRTPM Kemdikbudristek environment including a team of experts who oversee the start of the selection process until to stage reporting. With refers on book guide This, para holder interest- bro ( *stakeholders* ) can carry out research and community service activitiesits function with Good.

This guide has been adapted to the implementation of Information Technology-based management. masi and Communication (ICT) starting from the process of proposal, selection, implementation, monitoring and evaluation until with reporting. System management based ICT, supported with guide What is clear is that it has been proven that research and community service can be managedin a way efficient, transparent, And accountable.

Although this guidebook has been prepared with the utmost care, it is not exhaustive There may still be deficiencies. We ask for suggestions and criticism for improvement this manual in the next edition. Hopefully this Guidebook can guide activities research and community service in higher education so as to produce results inventions and innovations that can answer needs and increase the nation's competitivenessIndonesia.

## Attachment 2. Field Focus Research, Theme Research, And Topic Research Priority

No	Field Focus Research	Theme Research	Topic Research
1	Food-Agriculture	Breeding technology seed plant, cattle, And fish	Utilization technique radiation Forsarch strain mutant superior.
			Breeding plant with technologybased biotechnology.
			Breeding plant technique conventional.
			Revitalization And enhancement knowledge farmerbased community in breeding plant.
			Breeding cattle with technology based biotechnology.
			Breeding cattle technique conventional.
			Revitalization And enhancement knowledge farmerbased community in breeding cattle.
			Breeding fish with technology based biotechnology.
			Breeding fish technique conventional.
			Revitalization And enhancement knowledge farmerbased community in breeding fish.
			Utilization of local wisdom in the process breeding seeds plant, cattle, And fish
Anatomy plant from perspective anthropology culture			

No	Field Focus Research	Theme Research	Topic Research
1.	Food-Agriculture	Cultivation technology and utilization land sub-optimal	Modernization system agriculture and utilization land.
			Agriculture land sub-optimal wet.
			Optimization system agriculture tropical.
			Optimization of tropical agricultural systems in community Woman For resilience food family based knowledge local.
			Use of local wisdom in utilize And conserve land in frame continuity
		Development resource man agriculture	Development identity functional agriculture.
			Transformation between generation worker agriculture.
			Shift work agriculture on Woman farmer.
			Food based diversity resource plant local through role community, Woman, And family.
			Pattern development HR Agriculture on public traditional/local
		Technology postharvest and technological engineering processing food	Strengthening the agro-industry standard source Power local.
			Management and conservation resource land, water, And biological.
			<i>Precision agriculture</i> .
			Manipulation machines agriculture And processing.
			Technology irradiation preservation results agriculture.
			Diversification And downstream product agriculture, plantation, farm, And fishery.
			Revitalization And strengthening knowledge local Woman farmer.
			Management, conservation source Power, And downstream product based wisdom local
		Endurance technology and independence food	Supporter independence food (paddy, corn, And soya bean) And plant plantation.
			Independence food commodity ruminant.
			Independence food commodity waters.
			Results value chain efficiency agriculture, plantation, farm.
			Development product food based source Power tropical.
			Development product food functional.
			Technology development for detection forgery product agriculture, farm, And fishery.
			Technology development for testing product halal.
			and independence strategies food on public traditional

No	Field Focus Research	Theme Research	Topic Research
2	Integration Focus Energy Research - Energy New AndRenewable	Substitution technology material burn	Technology supporter conversion tomaterial burn gas (BBG).
			Dimethyl ether For energy House ladder And transportation.
			Development component converter kits.
			Development technology And product biogasoline.
			Development and utilization of bioenergy For transportation, electricity And industry.
			Development technology And utilization fuel cells.
			Development technologymaking bio-crude oil.
			Development technology making bioethanol generation
			Development of local fuels assubstituent material burn fossil
			Design get up PLT hot earth.
		Independence technology generator electricity	Design get up PLT micro hydro land And marine.
			PLT bioenergy (biomass, biogas, biofuel) massive.
			Design get up PLTB (Bayu).
			Land restoration and development initiationenergy electricity based source Power local
			Building economical And independent energy.
		Technology conservation energy	System <i>smart</i> grids And management conservation energy.
			Technology component electricity economical energy.
			Development of microgrid systemsin management energy renewable.
			Technology hybrid in utilizationsource energy renewable.
			Local wisdom in architecture for Building development energy saving
			Technology supporter EOR.
			Setup infrastructure NPP.
		Technology endurance,energy diversification and strengthening community social	Technology supporter clean coal.
			Transfer And adoption innovation diversificationenergy based community insightfulgender And sustainable.
			Model transformation community independent energyrenewable based knowledge local, community And public local.
			Technology development electrification rural.
			Technology appropriate To use in utilization energy new And renewable.
			Management Energy Renewable Based Wisdom Local Public

No	Bidang Fokus Riset	Tema Riset	Topik Riset
3	Kesehatan - Obat	Teknologi produk biofarmasetika	Penguasaan produksi vaksin utama (hepatitis, dengue).
			Penguasaan sel punca (stem cell).
			Penguasaan produk biosimilar dan produk darah.
		Teknologi alat kesehatan dan diagnostik	Pengembangan <i>in vivo</i> diagnostic (IVD) untuk deteksi penyakit infeksi.
			Pengembangan <i>in vivo</i> diagnostic (IVD) untuk deteksi penyakit degenerative.
			Pengembangan alat elektromedik.
		Teknologi kemandirian bahan baku obat	Pengembangan fitofarmaka berbasis sumber daya lokal.
			Bahan baku obat kimia.
			Saintifikasi jamu & herbal, teknologi produksi pigmen alami.
			Pengembangan obat tradisional berbasis IPTEK untuk penyakit-penyakit tropis (neglected diseases).
			Pengembangan teknologi biosimilar, biosintesis, dan biorefinery untuk produksi bahan obat.
			Etnomedisin (daun, akar, umbi, batang, buah)
		Pengembangan dan penguatan sistem kelembagaan, kebijakan kesehatan, dan pemberdayaan masyarakat Dalam mendukung kemandirian obat	Penguatan pengetahuan perempuan dalam pengembangan fitofarmaka berbasis pengetahuan lokal.
			Pengetahuan lokal untuk penggunaan jamu dan herbal dalam kesehatan masyarakat, yang sensitif <i>gender</i> dan inklusif sosial.
			Penguatan pengetahuan dan pengembangan kebiasaan masyarakat dalam berperilaku sehat.
		Komodifikasi kearifan lokal di bidang Kesehatan untuk menangani permasalahan kesehatan	Kearifan lokal untuk mendukung pola hidup bersih dan sehat
			Kearifan lokal untuk mengatasi wabah penyakit
			Kearifan Lokal Untuk Mengatasi Stunting dan Pola Asuh Anak dalam Keluarga
			Kearifan Lokal kaitannya dengan Pengolahan makanan sehat dan bergizi
			Identifikasi hambatan budaya dalam tumbuh kembang dan pola asuh anak
			Kearifan lokal di bidang Kesehatan untuk menangani permasalahan kesehatan reproduksi perempuan
Pengetahuan Perempuan Tentang Kesehatan Reproduksi berbasis Kearifan lokal			

No	Field Focus Research	Theme Research	Topic Research
4	Transportation	Technology and management safety transportation	Management safety.
			Means infrastructure supporter safety.
			Management transportation friendly <i>gender</i> , child, And group need special.
			Wisdom local in mobilitypublic traditional
			Adoption mark And norm public localin developing management safety transportation
		Strengthening technology transportation industryinternational	Mode road And rail.
			Mode water.
			Mode air.
			Strengthening the transportation industryfriendly environment social And culture
		Technology infrastructure And system support transportation	System intelligent management transportation.
			Technology infrastructure transportation.
			System construction infrastructure transportation.
			Work safety management implementation construction infrastructure.
			Control system management and quality assurance of implementation construction infrastructure transportation.
			Involvement of local figures in technology development planning infrastructure system transportation
		Policy studies, social And economy transportation	Basic research supporting technologyAnd system transportation.
			Social systems that support participation Woman, child, And inclusion social as well as inuse means And infrastructure transportation.
			Local knowledge for developmentpolicy transportation
		<i>Intelligent transportation system</i>	Management transportation urban/urban.
			Management transportation logistics.
		5	Technology InformationAnd Communication
Internet-based telecommunications protocols (IP) And <i>Internet of things</i> .			
<i>Network , data and information security</i> .			
Broadcasting multimedia based digital.			
I.T <i>security</i> .			
Development network sensors.			
Technology antenna And propagation wave radio.			

No	Field Focus Research	Theme Research	Topic Research
5	Technology Information And Communication	Development system/platform based Open Source	System ICT e-Government.
			System ICT e-Business.
			Frameworks/Platforms support industry creative And control.
			Technology-based information system supporter industry micro insightful <i>gender</i> And sustainable.
			System information based wisdom local
		Technology for Enhancement Content ICT	Technology and content for data information geospatial And senses.
			Development technology big data.
			Technology For data information various form wisdom local in Indonesia
		ICT device technology And supporter ICT	Device ICT For system network.
			Device ICT For <i>smart city</i>
			Device ICT For <i>customers premises equipment (CPE)</i> .
			Policy And social humanities supporter ICT.
			Technology device supporter participation Woman, child, group <del>and</del> needs , and security use information based ICT.
			Device ICT For preservation wisdom local
		Development based system Intelligence artificial	Development application system intelligent.
			Technology <i>robot vision</i>
6	Defense And Security	Supporting technology Power motion	Development product tool transport dimension land.
			Development product tool transport dimension sea.
			Development product tool transport dimension air.
			System adoption knowledge and technology local in developing tool product transport dimension land, sea, And air
			Local technology system in development product tool transport dimension land, sea, And air Which friendly Woman, child, & group prone to

No	Field Focus Research	Theme Research	Topic Research
6	Defense And Security	Supporting technologyPower thunder	Development product rocket.
			Development product handcuffs.
			Development product system weaponry.
		Supporting technology defense	Development product Command, control, Communication, Computing, Integration, Observation, And Reconnaissance (K4IPP), especially radar, communication tool and satellite.
			Development product material.
			Development source Power defense.
			Development of a supporting social system defense And security based culture localWhich insightful <i>gender</i> And inclusion social.
		Conflict handling through approach social culture	System-based defense system Knowledge And Technology local
			Identify local wisdom valuesin handling conflict
			Adoption values wisdom localFor handle conflict
7	Material Proceed	Technology mineral processingstrategic materials standard local	Extraction and designfactory metal land seldom.
			Development cell Sun based non silicon.
			Processing ore mineral strategic local.
		Technology development material functional	Production polymer For application separation in industry.
			<i>Material</i> supporter biosensors And chemosensor.
			Development membrane.
			Development catalyst And biocatalyst(enzyme) For application in industry.
			Innovation technology material material building local
			Technology extraction asphalt from rock experience (asphalt rock Buton).
			Development material geopolymer.
		Exploration technologypotency material new	Innovation technology material material building local.
			Design And exploration material pigment absorber.
			Supporter transformation materialrubbish And processing waste.
		Technology characterization materialand support industry	Supporter material structure.
			Characterization material based laser And optics.
			Characterization material biocompatible.
Independence material standard magnet strong			
Development material alloy.			

No	Field Focus Research	Theme Research	Topic Research
8	Maritime	Sovereign technology area 3T (front, isolated, backward)	Resilience social And strengthening economy coast.
			Community food sovereignty coast And island isolated.
			Border coastal management of aspect <i>social security</i> And <i>prosperity</i> .
			Diversification, And preservation resource marine.
			Exploration and utilization source Power coast And sea.
			Development technology And management islands small And coast.
			Development industry tourist nautical.
			Development industry tourist nautical in area 3T based wisdom local.
			System knowledge And technology local in preservation source Power sea And coast.
		Conservation technology environment maritime	Conservation And rehabilitation ecosystem coast And sea.
			Ecosystem and supporting zoning area conservation sea.
			Technology conservation And rehabilitation ecosystem coast And sea based wisdom local
			Exploration of local wisdom values in management and utilization source Power sea And coast.
			Health And service ecosystem coast And sea.
		Strengthening technology infrastructure maritime	Mastery technology survey SDE/SDA sea in.
			Development of vehicle technology coast, free beach, And sea in.
			Mastery technology communication, navigation, <i>security</i> and supervision.
			Development technology infrastructure beach And free beach.
			Integration of local wisdom in development technology infrastructure, communication, And vehicle maritime.

No	Field Focus Research	Theme Research	Topic Research
8	Maritime	Empowerment and improvement participation women and social inclusion In the environment maritime.	Revitalizing local wisdom for resilience, family And preservation source Power marine.
			Participation women, minority groups, And family For endurance, And diversification product processing source Power marine.
			Women's participation, and social inclusion in reception And utilization tourist nautical.
			Integration conservation environment maritimein the educational curriculum insightful <i>gender</i> And inclusion social.
			Participation Woman in development, maintenance, And strengthening infrastructure beach And free beach.
9	Disaster	Technology and management disaster geology	Mitigation subtraction risk disaster geology.
			Prevention And preparedness responsive emergency geology.
			Rehabilitation And reconstruction geology.
			Regulations And culture aware disaster geology.
			Danger And vulnerability geology.
			Technology And application digital inmanagement disaster geology.
			Exploration And adoption wisdom local aswarning early disaster geology
		Technology and management disaster hydrometeorology	Risk reduction mitigation disaster hydrometeorology.
			Prevention and preparedness, responsive emergency hydrometeorology.
			Rehabilitation And reconstruction hydrometeorology.
			Regulations and conscious culture disaster hydrometeorology.
			Danger And vulnerability disaster hydrometeorology.
			Deep digital technology and applications management disaster hydrometeorology.

9	Disaster	Technology and management disaster fire land And forest	Mitigation subtraction risk disaster fire land And forest.
			Prevention And preparedness responsive emergency fire land And forest.
			Rehabilitation And reconstruction fire land And forest.
			Disaster awareness regulations and culture fire land And forest.
			Revitalization of local cultural values and participation women for fire disaster prevention forest, field herding, And land productive.
			Danger And vulnerability disaster fire land And forest.
			Exploration And Adoption mark wisdom local in land and forest management For prevent disaster fire
		Technology and management disaster nature: earthquake, tsunami, flood bandang, land landslides, drought (dry), mountain erupted.	Empowerment mitigation based community.
			Technology warning early disaster natural.
			Re Cover y life social, economy, And culture public post disaster.
			Model and system development information mitigation disaster.
			Mapping disaster as information system room region And design building.
			Exploration and adoption of local wisdom as warning early disaster natural.
			Mitigation, change climate and governance ecosystem
		Change cover land And Power support land.	
		Contribution And role forest in change climate.	
		The resulting environmental management process change cover land And change climate.	
		Exploration and adoption of local wisdom overcome change climate And manage forest.	

No	Field Focus Research	Theme Research	Topic Research
9	Disaster	Technology and management environment	Study mapping health environment.
			Rehabilitation ecosystem.
			Exploration friendly environment.
			Regulations And culture.
			Technology And application digital in management disaster fire land And forest.
			Danger, vulnerability, risk And management biological disasters (including the spread of disease, insect explosion, explosion population bird, fish etc.).
			Biotechnology environment.
			Bioremediation environment.
			Management waste dangerous And poisonous.
			Environmental adaptation to change climate and/or pollution.
			Analysis risk environment.
			Conservation source Power natural.
			Valuation source Power natural.
			Restoration damage environment.
			Technology processing waste congested, liquid And gas.
			Local knowledge and technology systems in manage source Power natural For prevent damage environment.
		Policy development or regulation about activity production And consumption Which pro environment.	
		Disaster failure technology	Danger, vulnerability And risk failure technology.
			Management disaster failure technology (including nuclear, construction modern, etc.).
		Disaster social	Danger, vulnerability And risk disaster social (including damage social).
			Management disaster social.
			Wisdom local For prevent And overcome disaster social
		Mitigation sustainable to disaster natural	Region with vulnerability tall to disaster natural.
			Evaluation intelligent to facility general which has awakened ( <i>smart assessment on existing public facilities</i> ).
			Preparedness public face disaster natural.
			Disaster And wisdom local.
			Mitigation disaster natural based wisdom local

No	Bidang Fokus Riset	Tema Riset	Topik Riset
10	Sosial Humaniora - Seni Budaya - Pendidikan	Pembangunan dan penguatan sosial budaya	<i>Indigenous studies.</i>
			<i>Global village.</i>
			Identitas, mobilitas, <i>diversity</i> , dan multikulturalisme
			Budaya dalam upaya mencegah dan menangani akibat dari kekerasan, radikalisme, kekerasan berbasis <i>gender</i> , anak, etnisitas, agama, dan identitas lainnya, serta dalam upaya mengembangkan kesejahteraan dan keunggulan prestasi.

			Economy creative in support development sustainable.
			Policy in push economy creative.
Tourism and economic development creative based wisdom local Which fair <i>gender</i> , inclusion social, And continuity			

## Information:

Theme And topic Which listed on table in on Still nature dynamic. Changes will be made if there are strategic considerations and de- sack.

**Appendix 3.**  
**Description Level Readiness Technology (TKT)**  
**TKT Type General And Hard Engineering**

NO	DEFINITION/STATUS	INDICATOR
1	Principle base from technology researched And reported	<ol style="list-style-type: none"> <li>1. Assumption And law base (ex.physics/ chemistry) Which will used on technology (new) has determined;</li> <li>2. Studies literature (theory/ empirical -research previous) about principle base technology which will developed; And</li> <li>3. Formulation hypothesis research.</li> </ol>
2	Concept formulation and/ or application formulation.	<ol style="list-style-type: none"> <li>1. Equipment And system Which will used, has identified;</li> <li>2. Studies literature (theoretical/empirical) technology Which will developed possible For applied;</li> <li>3. Design in a way theoretical And empirical has identified;</li> <li>4. Elements base from technology Which will developed has is known;</li> <li>5. Characterization component technology Which will developed has mastered And understood;</li> <li>6. Performance from each element compiler technology Which will developed has predictable;</li> <li>7. Analysis beginning show that function main Which needed can Work with Good;</li> <li>8. Model And simulation For test truth principle base;</li> <li>9. Research analytic For test truth principle basically;</li> <li>10. Components technology Which will developed, in a way separated can Work with Good;</li> <li>11. Equipment Which used must valid And reliable; And</li> <li>12. Is known stages experiment Which will done.</li> </ol>
3	Proof draft function and/or characteristics important analytically And experimental	<ol style="list-style-type: none"> <li>1. Studies analytic support predictions performance element- element technology;</li> <li>2. Characteristics/traits And capacity show off Work system base has identified And predictable;</li> <li>3. Has done test laboratory For test appropriateness application technology the;</li> <li>4. Model And simulation support predictions ability elements technology;</li> <li>5. Development of this technology step by step Early use of very mathematical models possible And can simulated;</li> <li>6. Research laboratory to predict performance each element technology By theoretical, empirical And experiment has is known components system technology the can Work with Good;</li> <li>7. Has done research in laboratory with use data dummies; And</li> <li>8. Technology worthy in a way scientific (studies analytic, model/simulation, experiment).</li> </ol>

NO	DEFINITION/STATUS	INDICATOR
4	<p><b>Validate internal components/subsystems environment laboratory</b></p>	<ol style="list-style-type: none"> <li>1. Laboratory tests of components in a way separated has done;</li> <li>2. Condition system For application according to user has is known (desire adopters);</li> <li>3. Results test laboratory to component- components show that component the can operate;</li> <li>4. Test function main technology in environment Which relevant;</li> <li>5. Prototype technology scale laboratory has created;</li> <li>6. Research integration component has started;</li> <li>7. Process 'key' For its manufacturing has identified And studied in labs; And</li> <li>8. Integration system technology And design get upscale lab has finished ( <i>low fidelity</i> ).</li> </ol>
5	<p><b>Component validation/ subsystem in a environment Which relevant</b></p>	<ol style="list-style-type: none"> <li>1. Preparation production device hard has done;</li> <li>2. Market research ( <i>marketing research</i> ) and research laboratory For choose process fabrication;</li> <li>3. Prototype has created;</li> <li>4. Equipment And machine supporter hastested in laboratory;</li> <li>5. Integration system finished with accuracy tall ( <i>high fidelity</i> ), ready tested on real/simulated environment;</li> <li>6. Accuracy/ <i>fidelity</i> system prototype increase;</li> <li>7. Condition laboratory modified so that similar with environment Which indeed; And</li> <li>8. Process production has reviewed _ by part manufacture</li> </ol>
6	<p><b>Model demonstration or prototype system/ subsystem in something environment Which relevant</b></p>	<ol style="list-style-type: none"> <li>1. Condition environment operation actually has is known;</li> <li>2. Need investment For equipment And process manufacturing identified;</li> <li>3. M&amp;S For performance system technology on environment operation;</li> <li>4. Part manufacture/ manufacturing agree And accept results testing laboratory;</li> <li>5. The prototype has been tested with accuracy/fidelity a laboratory high in environmental simulation operational (Which Actually in outside laboratory); And</li> <li>6. The test results prove it technically feasible ( <i>engineering feasibility</i> ).</li> </ol>

NO	DEFINITION/STATUS	INDICATOR
7	<b>Demonstration prototype system in environment Actually</b>	<ol style="list-style-type: none"> <li>1. Equipment, process, method And design technique has identified;</li> <li>2. Process And procedure fabrication equipment start tested;</li> <li>3. Equipment process And equipment test / inspection tried out in in environment production;</li> <li>4. Draft picture design has complete;</li> <li>5. Equipment, process, method And design technique has developed And start tested;</li> <li>6. Calculation estimation cost has validated ( <i>design to cost</i> );</li> <li>7. Process fabrication in a way general has understood with Good</li> <li>8. Almost all function can walk in environment/conditions operation ;</li> <li>9. Prototype complete has demonstrated on simulation environment operational;</li> <li>10. Prototype system has tested on trials field; And</li> <li>11. Ready For production beginning ( <i>low rates initial production - lrip</i> ).</li> </ol>
8	<b>System has complete And reliable through testing And demonstration in actual environment</b>	<ol style="list-style-type: none"> <li>1. Form, suitability And function component compatible with system operation;</li> <li>2. Machine And equipment has tested in environment production</li> <li>3. Diagram end finished created;</li> <li>4. Process fabrication tried out on scale pilot ( <i>pilot line or lrip</i> ) ;</li> <li>5. Test process fabrication show results And level productivity Which can accepted;</li> <li>6. Test all over function done in simulation environment operation;</li> <li>7. All material/ material And equipment available For used in production;</li> <li>8. System fulfil qualification through test And evaluation.</li> <li>9. Ready For production scale full (capacity full).</li> </ol>
9	<b>System really tested/proven through success operation</b>	<ol style="list-style-type: none"> <li>1. Draft operational has truly can applied;</li> <li>2. Estimation investment technology Already created;</li> <li>3. No There is change design Which significant;</li> <li>4. Technology has tested on condition Actually;</li> <li>5. Productivity on level stable;</li> <li>6. All documentation has complete;</li> <li>7. Estimate price production compared to <i>competitors</i> ; And</li> <li>8. Competitor technology is known.</li> </ol>

## TKT Type Software

NO	DEFINITION/STATUS	INDICATOR
1	Principle base from technology researched And reported	<ol style="list-style-type: none"> <li>1. Represents level Lowest from readiness technology device soft;</li> <li>2. Represents realm device soft new Which currently explored by community research base; And</li> <li>3. Also includes development of level usage base, characteristic base from architecture device soft, formulation mathematics, realizable device concepts, study of basic software principles, scientific principles, formulation hypothesis research, And algorithm general.</li> </ol>
2	Formulation and/ or application technology.	<ol style="list-style-type: none"> <li>1. After principle base researched, continues on making application Which nature practical;</li> <li>2. Application nature speculative, And there is possibility has no evidence or detailed analysis to support assumption Which exist/ do; And</li> <li>3. Examples are limited to analytical studies with use data synthetic (artificial).</li> <li>4. User/ customer Already can identified, application system or subsystem Already identified</li> <li>5. Studies appropriateness application device soft</li> <li>6. Solution design empirical nor theoretical Already identified</li> <li>7. Component technology in a way partial Already characterized</li> <li>8. Prediction performance every element Already made</li> <li>9. Has done study impression/ interest user/ customers to device soft</li> </ol>
3	Proof draft function and/or characteristics important analytically And experimental	<ol style="list-style-type: none"> <li>1. There is initiation of the research process and development Which done in a way active;</li> <li>2. Appropriateness scientific showed through studies analytic And laboratory; And</li> <li>3. Also includes development of limited function environments For validate characteristic critical And predictions analytical use :</li> <li>4. A. Component device soft Which No integrated And B. Part data Which represent</li> <li>5. Prediction ability every element technology Already validated through study analytical</li> <li>6. Outline algorithm device soft available</li> <li>7. Prediction ability element technology Already validated through modeling And simulation</li> <li>8. Laboratory experiments have been carried out ensure appropriateness device soft</li> <li>9. Representative user Already Can included in development device soft</li> <li>10. Appropriateness scientific here fully showed</li> <li>11. Mitigation risk has identified</li> </ol>

NO	DEFINITION/STATUS	INDICATOR
4	<b>Validation module subsystem In the environment laboratory</b>	<ol style="list-style-type: none"> <li>1. Component device soft base integratedWork in a way together;</li> <li>2. Relatively primitive related with efficiency And reliability ( <i>robustness</i> ) compared to with system/product Finally;</li> <li>3. Architectural development begins with coverage of issues related interoperability, reliability, convenience maintenance, ability enhancement, scalability, And security;</li> <li>4. There is business adjustment with element (technology) current; And</li> <li>5. Prototype Which There is developed For showaspect Which different on system/product Finally.</li> <li>6. Issue “ <i>cross technology</i> ” (If There is) fully has identified</li> <li>7. Development architecture system device soft in a way formal started</li> <li>8. Document need user</li> <li>9. Algorithm has converted to <i>pseudocode</i></li> <li>10. Analysis need data format has complete</li> <li>11. Demonstration device soft Already donein environment simple</li> <li>12. Estimate size device soft</li> <li>13. Study integration started</li> <li>14. Draft design conceptual documented</li> </ol>
5	<b>Module validation and/ or deep subsystem environment Which relevant</b>	<ol style="list-style-type: none"> <li>1. Is the level at which the device technology soft Which developed Ready For integratedwith system Which Already There is;</li> <li>2. Implementation prototype Which in accordance with environment/interface;</li> <li>3. Done experiment to problemWhich actually (real);</li> <li>4. Do simulation to interfacefrom system Which Already There is;</li> <li>5. Architecture device soft system finished; And</li> <li>6. Algorithm walk on (multi) processor in environment operational with characteristics Which in accordance hope</li> <li>7. Influence “ <i>cross technology</i> ” (If There is) hasidentified And set through analysis</li> <li>8. Need interface system is known</li> <li>9. Architecture device soft system Already set</li> <li>10. Analysis need interface internal has complete</li> <li>11. <i>Coding</i> function/module has complete</li> <li>12. Prototype has made</li> <li>13. Quality And reliability already become consideration</li> <li>14. Environment laboratory Already modified approach environment operational</li> <li>15. management risk documented</li> <li>16. Function Already integrated in modules</li> <li>17. <i>Drafts test and evaluation masters plans</i></li> </ol>

NO	DEFINITION/STATUS	INDICATOR
6	<p>Validation module and/or subs <i>systems in the environment “end-to-end” (end-to-end environment) Which relevant</i></p>	<ol style="list-style-type: none"> <li>1. Represents level Where appropriateness manipulation from technology device soft showed; And</li> <li>2. Covers Also implementation prototype laboratory with problem realistic scale full, Where technology device soft integrated in a way Partial with device hard/soft from system Which Already There is.</li> <li>3. Validation characteristics measurement And performance “ <i>cross technology</i> ” has complete</li> <li>4. Level quality And reliability tea set</li> <li>5. Environment operational has is known</li> <li>6. M&amp;S done For simulate performance system in environment operational</li> <li>7. Test and evaluation masters plans Already final</li> <li>8. Analysis structure <i>databases</i> And interface has complete</li> <li>9. Documentation device soft limited Already There is</li> <li>10. Device soft version “ <i>alpha</i> ” released . _</li> </ol>
7	<p>Prototype demonstration system in the environment operational or environment accuracy tall</p>	<ol style="list-style-type: none"> <li>1. Represents level Where appropriateness program from technology device soft showed; And</li> <li>2. Includes also implementation of environmental prototypes operational, Where functionality risk technical Which nature critical is available to demonstrate and test under conditions the software technology is well integrated with device hard/soft from system operational.</li> <li>3. System prototype Already built</li> <li>4. Algorithm Already walk on processor in environment operations</li> <li>5. Part big “ <i>bugs</i> ” device lunak Already No There is</li> <li>6. Device soft “ <i>beta</i> ” version released _</li> <li>7. Process manufacture device soft in a way general Already can understood</li> <li>8. Plan production has complete</li> </ol>
8	<p>System in a way actual has complete and fulfilling requirements through testing and demonstrations in operational environment/ application Actually</p>	<ol style="list-style-type: none"> <li>1. Represents level Where technology device The software is fully integrated with the device hard And soft from system operational;</li> <li>2. Documentation development device soft complete; And</li> <li>3. All function tested Good in scenario simulation nor operational.</li> <li>4. Device soft in a way whole Already in- <i>debugged</i></li> <li>5. Diagram architecture end has finished</li> </ol>

NO	DEFINITION/STATUS	INDICATOR
9	The system is truly tested/proven through successful operational	<ol style="list-style-type: none"> <li>1. Represents level Where technology device softIt is ready to be developed and used in a way repeated ( <i>rapid development/re- use</i> );</li> <li>2. Device soft based technology Which fully integratedwith device hard/soft from system operational;</li> <li>3. All documentation device soft has verified;</li> <li>4. Own experience success from side operational;</li> <li>5. There is support sustainable to manipulation device soft; And</li> <li>6. System nature actual (truly There is And used)</li> <li>7. Production device soft Already stable</li> <li>8. All documentation has complete</li> <li>9. Draft operational has implemented with success</li> </ol>

## TKT Type Software

NO	DEFINITION/STATUS	INDICATOR
1	Principle base from something technology has researched	<ol style="list-style-type: none"> <li>1. Formulation question research or hypothesis study Already There is;</li> <li>2. Studies literature about principle base relatedstudy Already done; And</li> <li>3. Methods/methods/processes/products researched and will be developed Already There is And own opportunity success.</li> </ol>
2	Technology concept and application has in formulate	<ol style="list-style-type: none"> <li>1. Means And infrastructure Which will used has identified;</li> <li>2. Validation results studies literature has done; And</li> <li>3. Design study in a way theoretical And empirical has identified.</li> </ol>
3	Concept and characteristics important from something technologyhas been proven analytical And experimental	<ol style="list-style-type: none"> <li>1. Design research Already arranged (methodology choice, stages,And data Which needed For study);</li> <li>2. Theoretically, empirically and experimentally have been is known And components system technology the can Work with Good; And</li> <li>3. Technology has worthy in a way scientific (studiesanalytic, model/simulation, experiment).</li> </ol>

NO	DEFINITION/STATUS	INDICATOR
4	Technological components has been validated in environment laboratory	<ol style="list-style-type: none"> <li>1. Laboratory tests of components in a way separated has done;</li> <li>2. Performance from each component technology (method/method/process/product) to be developed has showing results Which Good;</li> <li>3. Experiment the main functions of deep technology environment Which relevant has held;</li> <li>4. Prototype technology scale laboratory has created;</li> <li>5. Study integration component has started;</li> <li>6. Analysis beginning show that function main Which needed can Work with Good; And</li> <li>7. Integration component technology And design get upscale laboratory has tested ( <i>low fidelity</i> ).</li> </ol>
5	Technological components has been validated in environment Which relevant	<ol style="list-style-type: none"> <li>1. The technology prototype is ready to be tested in laboratory conditions modified Which approach environment Which indeed;</li> <li>2. Accuracy/ <i>fidelity</i> increase;</li> <li>3. Integration component technology has tested with accuracy tall ( <i>high fidelity</i> ).</li> </ol>
6	Model or Prototype has tested in the environment Which relevant	<ol style="list-style-type: none"> <li>1. Condition something technology hasis known (on condition optimal);</li> <li>2. The technology has been tested with high accuracy on operational environment simulation with data complete (in accordance with design or design research);</li> <li>3. Results test prove worthy in a way technical( <i>engineering feasibility</i> ); And</li> <li>4. Draft analysis economy (estimation beginning appropriateness economy) Already available.</li> </ol>
7	Prototype has tested in environment Actually	<ol style="list-style-type: none"> <li>1. Condition environment operational / actually for technology has is known;</li> <li>2. Has done test multi location technology scale field;</li> <li>3. Results test roomy show performance / performance Which stable;</li> <li>4. Results test multi location prove worthy in a way technology.</li> <li>5. Need investment For process production has identified; And</li> <li>6. Analysis appropriateness economy complete (results validation in environment Actually).</li> </ol>
8	Technology Systems have complete and fulfilling condition ( <i>qualified</i> )	<ol style="list-style-type: none"> <li>1. Picture prototype And detail engineering equipment supporters have available;</li> <li>2. Cultivation process with productivity levels Which desired has mastered;</li> <li>3. Has done standardization technology; And</li> <li>4. All material/ material And equipment For used in production has available.</li> </ol>

NO	DEFINITION/STATUS	INDICATOR
9	Technology really tested/proven through success operation	<ol style="list-style-type: none"> <li>1. Draft application technology truly can applied;</li> <li>2. Estimation investment technology Already created;</li> <li>3. No There is change design Which significant;</li> <li>4. Technology has tested on environment Actually;</li> <li>5. Has fulfil certification Which needed; And</li> <li>6. All documentation has complete.</li> </ol>

## TKT Type Health-Products Vaccines/Biologicals

NO	DEFINITION/STATUS	INDICATOR
1	Principle base from technology researched And reported	<ol style="list-style-type: none"> <li>1. Studies literature scientific about principle basetechnology Which developed Already There is;</li> <li>2. Surveys beginning market has started And assessed;</li> <li>3. Potency application scientific For solutionproblem has depicted.</li> </ol>
2	Concept formulation and/or application formulation. (Intensive intellectual ones focus on the problem produces literature studies that review and generate research ideas, hypotheses and design experiment related issues scientific.	<ol style="list-style-type: none"> <li>1. Hypothesis has formed;</li> <li>2. Development design research Already There is;</li> <li>3. Research protocol for testing truth principle Already There is; And</li> <li>4. Protocol Already reviewed _ by gatheringpara expert And Approved.</li> </ol>
3	Proof draft function And/ or characteristics important in a way analytical And experimental. Initiation <i>Proof of Concept</i> for development vaccine products are described with study limited Good in a way <i>in vitronor in Vivo</i> on animal model.	<ol style="list-style-type: none"> <li>1. Studies analytic support predictions performanceelement- element technology Already There is;</li> <li>2. Characteristics/traits and performance capacity system base has identified And predictable;</li> <li>3. Experiments have been carried out laboratory in a way <i>in vitro</i> ; And</li> <li>4. Has done test laboratoryin a way <i>in Vivo</i> on animal model.</li> </ol>

NO	DEFINITION/STATUS	INDICATOR
4	<p>Validation components/subsystems in environment laboratory. Basic components of integrated technology to show that technology will work together. Currently <i>low fidelity</i> (still error is possible) if compared to with technology original. Example addition tool ad hoc in Laboratory. Study laboratory non GLP done to define the hypothesis and identify relevant data necessary for technology assessment on design experimental Which accurate. Studies explorative from critical technology For effective integration into the candidate biologics/vaccines (pH, <i>adjuvants</i> , <i>stabilizers</i> , preservative, <i>buffer</i> , method of administration, method purification Which proposed, characterization chemistry and physics, metabolite results and excretion/ elimination, <i>dose ranging</i> , test challenge (For protection). Candidate vaccines/biologics has been tested on animal models for see potency, effect biology, security, effects side effects and toxicity. <i>Marker</i> marker For determine <i>end point</i> on preclinical nor test clinical Already identified.</p>	<ol style="list-style-type: none"> <li>1. Prototype scale Lab has produced;</li> <li>2. Prototype scale Lab <i>Good Laboratory Practice</i></li> <li>3. (GLP) has generated For material test Preclinical;</li> <li>4. Process 'key' For production has identified And studied in labs;</li> <li>5. Integration system technology And design get upscale lab has finished ( <i>low fidelity</i> );</li> <li>6. Has set <i>Target Products Profiles</i> (TPP) consists from description preparation, content preparation, indication, dosage, <i>dose ranging</i> , method of administration, efficacy, effects side Which possible, type preparation; And</li> <li>7. Initial preclinical tests include safety tests and efficacy of a biologic/vaccine candidate has depicted And defined in animal model.</li> </ol>
5	<p>Validation components/subsystems in something environment Which relevant. Period intensive studies non clinical And preclinical done involve data parametric and analysis is carried out on that system validated, and pilot scale production of biologic/vaccine candidates. Research results show test potency Which in accordance, proposal production that will meet GMP rules on scale pilot, identification And proof PoC on animal test can predict test in humans, via appropriate markers. Do GLP test toxicity on animal test, set markers For predictions clinical trials in humans, as well as proving immunogenicity And potency, as well as PK And PD And initiation from studies stability preparation.</p>	<ol style="list-style-type: none"> <li>1. Preparation production And facility GMP;</li> <li>2. Production biology/vaccines scale pilot has designed And done;</li> <li>3. Formulas parent preparation biology/vaccines has reviewed _by <i>Quality assurance</i> And fulfil rule GMP;</li> <li>4. Test preclinical security, immunology/activity biology And efficacy preparation GLP has done;</li> <li>5. The design for clinical trials in humans has been created and registered to Body POM based on test preclinical;</li> <li>6. Design test stability And test stability limited has done.</li> </ol>
6	<p>Demonstration model or prototype system/subsystem in a environment Which relevant. Pre-IND discussions have begun with the Agency POM and documents have been prepared and entered, Phase 1 CT was done done on amount participant small and subjects are controlled and evaluated exists symptom clinical in a way intensive. Data immunogenicity And or pharmacokinetics and pharmacodynamics are readily available for predictions CT phase 2 in man.</p>	<ol style="list-style-type: none"> <li>1. 1 clinical trials in humans with numbers limited has been carried out and fulfilled security requirements and show results immunogenicity And pharmacokinetics (PK) And pharmacodynamics (PD) Which expected; And</li> <li>2. Data results test clinical 1 Which support arranged protocol test clinical phase.</li> </ol>

NO	DEFINITION/STATUS	INDICATOR
7	<p>System prototype demonstration in environment Actually. Test CT phase 2 For evaluate security and immunogenicity and activity biology done. Finals dose product, <i>dose ranging</i> , method And time giving Already set from results PK/PD. Phase 2 CT results data were documented and reported to the Director General of POM for preparation test CT phase 3 ( <i>efficacy</i> ). Point enda clinical test site and its markers are established on agreement Body POM.</p>	<ol style="list-style-type: none"> <li>1. Test clinical phase 2 in man Already held;</li> <li>2. Product dosage data, ranging dosage, method And time giving as well as data pkand pd becomes the basis for compiling protocol test clinical phase 3 has There is;</li> <li>3. Protocol test clinical phase 3 has madeAnd submitted to body pom;</li> <li>4. Has done <i>scaling up</i> process to scale commercial in accordance condition gmp;</li> <li>5. Process validation at production scalehas done; And</li> <li>6. Production facilities and space to scale production Which fulfil gmp has prepared.</li> </ol>
8	<p>Complete and reliable through testing and demonstrations in the environment Actually. Results test CT phase 3 fulfil condition security And efficacy from candidateiologic/vaccine. Process validation is complete fulfilled, and reproducibility studies/ consistency Already done. Pre registrationAlready be delivered to Body POM.</p>	<ol style="list-style-type: none"> <li>1. Agreement registration from Body POM;</li> <li>2. Drafting <i>dossier</i> has started related <i>Chemical</i> , <i>Material</i> and <i>Control</i> data , facility, building, power Work, etc;</li> <li>3. Facility production has Approved by Body POM;</li> <li>4. Test clinical phase 3 fulfil condition;</li> <li>5. <i>Dossier</i> has registered to Body POM; And</li> <li>6. Product has registered to body POM.</li> </ol>
9	<p>The system is truly tested/proven through success operation. Biologics/vaskinAlready can distributed And marketed. <i>Post marketing studies</i> are designed after there is an agreement with the POM and did it <i>post marketing surveillance</i> (PMS). <i>Surveillance</i> done Keep going continuously.</p>	<ol style="list-style-type: none"> <li>1. Production routine product biologics/vaccines have been done;</li> <li>2. Distribution And marketing productbiology/vaccines has done;</li> <li>3. Pms protocols on biological and animal productsAlready made And submitted to body pom; And</li> <li>4. Pms has held</li> </ol>

## TKT Type Health - Product Tool Health

NO	DEFINITION/STATUS	INDICATOR
1	<b>Proof Principle Base Technology</b> <i>(Basic Principle Report)</i>	<ol style="list-style-type: none"> <li>1. Level Lowest readiness technology;</li> <li>2. Explanation theoretical principle base technology;</li> <li>3. Survey beginning utility technology;</li> <li>4. Study of the basic concepts of scientific theory underlying technology tool health related;</li> <li>5. Formulation of basic concepts and proof in a way theoretical; And</li> <li>6. Review of scientific literature related to the principles principle base technology.</li> </ol>
2	<b>Technology Concept Formulation (</b> <i>Technology Concept formulation).</i>	<ol style="list-style-type: none"> <li>1. Formulate topics study, compile hypothesis, and planning designs experiment to find a solution problem with base technology related;</li> <li>2. Preparation of scientific hypotheses. Making plan study And protocol get review And agreement; And</li> <li>3. Through study literature And discussions scientific, arranged plan study And studies For identify potency And opportunity therapeutic targets. Documented in form protocol or plan study which received review and approval.</li> </ol>
3	<b>Research to prove the concept technology</b> <b>(Research of Technology Concept).</b>	<ol style="list-style-type: none"> <li>1. Basic research, data collection and analysis experiment, For test hypothesis Which arranged. Inspect draft alternative, And identify as well as evaluate component technology;</li> <li>2. Testing beginning to draft design And evaluation various alternative;</li> <li>3. Verification design, determination specification component;</li> <li>4. Initial proof of the truth of the concept (proof- of- concept) medical device technology on amount limited And model laboratory; And</li> <li>5. Documentation results test scale laboratory Which give proof beginning truth draft technology tool health.</li> </ol>
4	<b>Validation component and/or</b> <b>sequence laboratory scale system</b> <i>(Validation Components in laboratories).</i>	<ol style="list-style-type: none"> <li>1. Test And testing scale model laboratory to evaluate and review levels security, effect side And effectiveness;</li> <li>2. Preparation of procedures and methods used in studies non clinical And clinical;</li> <li>3. Proving the truth of the concept ( <i>proof-of-concept</i> ) technology And level security; And</li> <li>4. Publication ( <i>peer-reviewed</i> ) of evidentiary data truth draft technology And level security.</li> </ol>

NO	DEFINITION/STATUS	INDICATOR
5	<b>Prototype Scale Laboratory</b> <i>(Lab Scale prototype).</i>	<ol style="list-style-type: none"> <li>1. Determining the classification (class 1, 2 or 3) of the prototypetool health based on equality with tool health Which Already There is;</li> <li>2. Testing level security prototypelab scale based on standards applies (for example: iec60601);</li> <li>3. Lab scale prototype validation testing about effectiveness And effect side, as well asinterference to/from equipment other. (For tool health class 1-2); And</li> <li>4. Proof level security And effectiveness prototype scale lab.</li> </ol>
6	<b>Prototype Scale Industry</b> <i>(Industrial Scale prototype).</i>	<ol style="list-style-type: none"> <li>1. Industrial scale prototype validation testing on a limited amount of effectiveness and side effects, as well as interference with/from equipment other. (For tool health class 1-2);</li> <li>2. 1 clinical testing of industrial scale prototypes for know level security And effectiveness on amount limited (For tool health class 3); And</li> <li>3. Proof level security And effectiveness prototype scale industry on amount limited.</li> </ol>
7	<b>Testing Field Prototype Scale Industry</b>	<ol style="list-style-type: none"> <li>1. Testing validation prototype scale industry on amount big For ensure effectiveness and reduce side effects, as well prevent interference to/from equipmentother. (For tool health class 1-2)</li> <li>2. Phase 2 clinical testing of industrial scale prototypes For ensure level effectiveness on amountmore big (For tool health class 3)</li> </ol>
8	<b>Prototype Complete Tested.</b>	<ol style="list-style-type: none"> <li>1. Industrial scale prototype validation testing on larger quantities to be sure effectiveness and complete data required. (For tool health class 1-2);</li> <li>2. Industrial scale prototype phase 3 clinical testing For ensure level effectiveness on amountmore more wide (For tool health class 3);</li> <li>3. Certification And standardization, as well as submissionlicensing Which necessary; And</li> <li>4. Proving the level of safety and effectiveness prototype scale industry on amount more big.</li> </ol>
9	<b>Prototype Tested And Certified.</b>	<ol style="list-style-type: none"> <li>1. Tool health can distributed And marketedafter get licensing Which necessary;</li> <li>2. Setup service And supervision full sell; And</li> <li>3. Strategy marketing And supervision full sell.</li> </ol>

## TKT Type Pharmacy

NO	DEFINITION/STATUS	INDICATOR
1	Principle base from technology researched And reported.	<ol style="list-style-type: none"> <li>1. Reviews And evaluation invention scientific as Foundation For classification technology new;</li> <li>2. Has done survey beginning about markets And the assessment; And</li> <li>3. Has There is explanation about applicationpotential scientific problems problem Which has determined.</li> </ol>
2	Formulation draft And/ or application formulation. Focus intellectual on problem, which resulted in a study of publication scientific Which review and generate research ideas, hypothesis and experimental design connection discourse scientific related.	<ol style="list-style-type: none"> <li>1. Has it produces hypothesis</li> <li>2. Has developed, reviewed And he agreed <i>research plans</i> And or <i>research protocols</i></li> </ol>
3	Proof draft function And/ or characteristics important in a way analytical And experimental. Initial synthesis of candidate drugs is carried out, identify location and mechanism it works And characterization beginning todrug candidate in studies preclinical.	<ol style="list-style-type: none"> <li>1. Has done And proved it <i>proof of concept</i> beginning as drug candidate in model research <i>in vitro</i> And <i>in Vivo</i> in amount limited; And</li> <li>2. Has commencement research base, collection data and analysis to test hypotheses, explore alternative concepts and identify as well as evaluate technologyWhich support development drug.</li> </ol>
4	Component/subsystem validation in environment laboratory.	<ol style="list-style-type: none"> <li>1. Research was conducted in non-GLP laboratories ( <i>Good laboratories Practice</i> ) in something designtest Which strict (condition worst);</li> <li>2. Has done research exploration drug candidate (that is formulation, method giving drug, method synthesis, characteristic physique And chemical, track metabolism And excretion or expenditure from body, And measurement dose usage);</li> <li>3. Has done testing drug candidate onanimal models to identify and assess its potential safety and toxicity, incompatibility, And effect side; And</li> <li>4. It has been carried out and proven by <i>proof of concept</i> (proof draft) And security formulation drug candidates on a laboratory scale or on animal model Which set.</li> </ol>

NO	DEFINITION/STATUS	INDICATOR
5	<p><b>Validate internal components/subsystems something environment Which relevant.</b></p>	<ol style="list-style-type: none"> <li>1. Achieving a decision point is confirmed there is sufficient data regarding the candidate drug in the draft technical data package for support continuation process with preparation application <i>Investigational New Drugs</i> (IND);</li> <li>2. Has done research non-clinical And clinical strictly includes data collection parameter And analysis in method Which well formulated with <i>a pilot lot</i> (prototype Which validated) drug candidate;</li> <li>3. Results research use <i>pilot lots</i> give foundation for the production process fulfil CGMP ( <i>Current Good Manufacturing Practice</i> )-compliant <i>pilot lots</i> production;</li> <li>4. Has did it study security And toxicity in a way GLP use animal model;</li> <li>5. Has done identification <i>endpoints</i> efficacy clinical ( <i>clinical efficacy</i> ) or <i>surrogate</i> his;</li> <li>6. A study has been carried out for evaluate pharmacokinetics and pharmacodynamics drug candidate; And</li> <li>7. Has started research stability.</li> </ol>
6	<p><b>Demonstration model or prototype system/subsystem in a environment Which relevant.</b></p>	<ol style="list-style-type: none"> <li>1. Test clinical Phase 1 done For prove security drug candidate on man in amount small And in supervision Which heart- heart And monitored condition the clinical;</li> <li>2. Application IND prepared And submitted (submit);</li> <li>3. Technology production proven through qualification facility cgmp; And</li> <li>4. Results from Phase 1 testing have been conducted and fulfil condition security clinical And support process to test clinical Phase 2.</li> </ol>
7	<p><b>Demonstration prototype system in environment Actually.</b></p>	<ol style="list-style-type: none"> <li>1. Test clinical Phase 2 has done For prove preliminary efficacy and to obtain data security And toxicity more carry on;</li> <li>2. Plan research clinical Phase 3 or plan <i>surrogate</i> test has Approved;</li> <li>3. Activity product (that is proof beginning efficacy) has determined;</li> <li>4. Has determined dose product end, range dosage, schedule, method of administration, proven (established) from pharmacokinetic data and pharmacodynamics in a way clinical; And</li> <li>5. Has done <i>scaling up</i> process For scale commercial Which fulfil condition GMP.</li> </ol>

NO	DEFINITION/STATUS	INDICATOR
8	complete and reliable through testing and demonstration in environment Actually.	<ol style="list-style-type: none"> <li>1. Validation process has finished held And followed with test lots <i>consistency</i> (consistency product end);</li> <li>2. Has done test clinical phase 3 Which expanded or <i>surrogate</i> test to gather information related security And effectiveness drug candidate. Testing done For evaluate wholerisk-benefit from giving drug candidate And For give base Which EnoughFor giving label drug ( <i>drugs labeling</i> );</li> <li>3. <i>Dossier</i> prepared And submitted to BPOM;</li> <li>4. Agreement <i>dossier</i> For drug by BPOM; And</li> <li>5. Facility scale production commercial hasThere is And has inspected BPOM.</li> </ol>
9	The system is truly tested/proven through success operation.	<ol style="list-style-type: none"> <li>1. Pharmaceuticals (drug) or tool medical hasdistributed/marketed; And</li> <li>2. Has done research And supervision post-marketing (non-clinical nor clinical).</li> </ol>

## TKT Type Social Humainora And Education

NO	DEFINITION/STATUS	INDICATOR
1	The basic principles of research have been observed And reported	<ol style="list-style-type: none"> <li>1. Background behind And objective R&amp;D has defined;</li> <li>2. There is question R&amp;D (question research) Which want to is known or answered;</li> <li>3. Relevant facts and basic arguments and support necessity done R&amp;D; And</li> <li>4. R&amp;D required For supportgovernment policy, knowing phenomenon or solution problem, etc</li> </ol>
2	Support Data Beginning, Hypothesis, Design& Procedures R&D has explored	<ol style="list-style-type: none"> <li>1. Hypothesis R&amp;D has arranged;</li> <li>2. Initial data supports the questionR&amp;D Which want to answered;</li> <li>3. R&amp;D design ( <i>research design</i> ) will done has explored (determination topics data, preparation questionnaire, theme FGD, etc.); And</li> <li>4. Alternative methodology, procedure And stagesWhich will done has explored</li> </ol>

NO	DEFINITION/STATUS	INDICATOR
3	<b>Design And Methodology Study arranged Complete</b>	<ol style="list-style-type: none"> <li>1. Design methodology Which used For answer question study has arranged;</li> <li>2. Sampling design, and/ or gathering data requirements and technique collection data has arranged;</li> <li>3. Adequacy And completeness data has set;</li> <li>4. Evaluation technical And predictions results has done;</li> <li>5. Scenario And alternative For completeness data has arranged; And</li> <li>6. Design R&amp;D has Complete.</li> </ol>
4	<b>Collection , Validation on Environment Simulation or Example /Activity R&amp;D</b>	<ol style="list-style-type: none"> <li>1. Collection data primary has held (questionnaire/FGD//or in form other);</li> <li>2. Validation For ensure data Which obtained relevant And related has held;</li> <li>3. Secondary data support can complete the data beginning Which has obtained previously; And</li> <li>4. Data Which There is tested validity And its reliability. Reliability data And system (relatively) Still low compared to with system Which expected.</li> </ol>
5	<b>Data Completeness and Analysis on Environment Simulation / Activity R&amp;D</b>	<ol style="list-style-type: none"> <li>1. Reliability data has increase significant;</li> <li>2. Data has Enough And fulfil requirements for further analysis;</li> <li>3. Preliminary analysis with that data complete has done;</li> <li>4. Data integrated For analysis taking conclusion; And</li> <li>5. Progress Report (preliminary analysis has been generated) And design output has arranged.</li> </ol>
6	<b>Results R&amp;D important And significant For supporter decision And policy</b>	<ol style="list-style-type: none"> <li>1. Report (conclusion from analysis has been generated) has been prepared;</li> <li>2. Humainora and Social R&amp;D results/output Education (making recommendation / <i>policy briefs</i> And other) has finished created;</li> <li>3. Design recommendation (alternativereregulation, policy or intervention government) has produced;</li> <li>4. List party related with regulations/ policy/ intervention Which recommended has is known;</li> <li>5. Initial communication with related parties (internal external) start done; And</li> <li>6. Letter Introduction delivery Results / Outputs R&amp;D has prepared.</li> </ol>

NO	DEFINITION/STATUS	INDICATOR
7	<i>current Good Manufacturing Practice</i>	<ol style="list-style-type: none"> <li>1. Letter Introduction And Results / Outputs R&amp;D (recommendations/conclusions/alternatives) has be delivered to party related;</li> <li>2. Proof ( <i>Evidence</i> ) accepted results /Outputs R&amp;D by party related;</li> <li>3. Results/ output R&amp;D Which be delivered becomereference And information for party related;</li> <li>4. Part or several R&amp;D results/outputs Which be delivered become basic considerationto improve the application of non-R&amp;D results Social Humainora, And Education or strategy utilization And application the result;</li> <li>5. Some or some of the R&amp;D results/output submitted as a basis/consideration for regulations / policy or intervention government; And</li> <li>6. Happen communication intensive with partyrelated about results/output R&amp;D.</li> </ol>
8	<b>Support for Regulations and Policies related to Social Aspects Humainora And Education</b>	<ol style="list-style-type: none"> <li>1. Part big (more half) results/ output R&amp;DSocial Humanities and Education are the basis/ considerations for improving the application of the results non-Social R&amp;D Humanora and Education or strategy utilization And application the result;</li> <li>2. Most (more than half) of the results/output Humanora Social R&amp;D and Education be delivered become basic consideration For regulations/policies or government intervention;</li> <li>3. Happen communication (intensive) withrelated parties regarding the results/output R&amp;D and action he continued; And</li> <li>4. Proof (evidence) has utilized itresults / output R&amp;D by party related.</li> </ol>
9	<b>Contribution policy Which recommendedFor repair Condition Development</b>	<ol style="list-style-type: none"> <li>1. Recommendations from R&amp;D results provide contribution in repair results R&amp;D nonSocial Humainora And its application;</li> <li>2. Recommendations from R&amp;D results make a contribution in repair element social economy public;</li> <li>3. Results R&amp;D And recommendation truly has succeed improve conditions socio-economic;</li> </ol>

## TKT Type Art

NO	DEFINITION/STATUS	INDICATOR
1	The basic principles of art have been observed And reported	<ol style="list-style-type: none"> <li>1. Background behind And formulationproblem has identified;</li> <li>2. Question R&amp;D ( <i>research/creative question</i> ) which is already known or answered For get findings;</li> <li>3. Objective R&amp;D has defined withsee formulation problem R&amp;D;</li> <li>4. Identification problem has doneto gain ground thinking as approach;</li> <li>5. Research approach/ planning/ creation/ viewing has set;</li> <li>6. Fact empirical And argument base Which relevant Andsupport necessity has done R&amp;D;</li> <li>7. Has There is studies literature, theoretical/empirical researchprevious become base R&amp;D;</li> <li>8. There has been a method/method/process that has been researched/ created/ applied And will developedas well as own opportunity success.</li> </ol>
2	Draft and/or application form artformulated And has explored;	<ol style="list-style-type: none"> <li>1. Principle base R&amp;D has explored;</li> <li>2. Has There is principle base R&amp;D Which nature qualitative, unique, particularism (fact, information),interpretation meaning, And narrative-descriptive;</li> <li>3. R&amp;D design ( <i>research design</i> ) has been communicated with <i>focused groups discussion</i> (FGD) (specifically art creation and topic study certain) Which refers on chart flow creative, productive, And distributive;</li> <li>4. Elements base art, that is form ( <i>appearance</i> ),weight ( <i>content</i> ), And appearance has set;</li> <li>5. Characteristics elements aestheticshas mastered And understood;</li> <li>6.
