

## Module Description

<b>Module name</b>	Course Module
<b>Module level, if applicable</b>	Master of Physics Education
<b>Code, if applicable</b>	32363252
<b>Subtitle, if applicable</b>	-
<b>Course, if applicable</b>	Advanced Thermodynamics
<b>Semester(s) in which the module istaught</b>	III (Odd Semester)
<b>Person responsiblefor the module</b>	Lecturer of Courses
<b>Lecturer</b>	1. Dr. Iwan Sugihartono
<b>Language</b>	Indonesian Language [Bahasa Indonesia]
<b>Relation to Curriculum</b>	This course is an elective course and is offered in the 3 <sup>rd</sup> semester.
<b>Type of teaching, contact hours</b>	<p>Teaching methods used in this course are:</p> <ul style="list-style-type: none"> <li>- Lecture (i.e., case-based learning, cooperative learning, and blended learning)</li> <li>- Structured assignments (i.e., essays and case study)</li> <li>- Practice (i.e., computer simulation and case study in laboratorium)</li> </ul> <p>The class size for lecture is 20 students. Contact hours for lecture is 26.67 hours, assignments are 64 hours, and privat study is 64 hours</p>
<b>Workload</b>	For this course, students required to meet a minimum of 154.67 hours in one semester, which consist of: 26.67 hours for lecture, 64 hours for structured assignments, 64 hours for private study
<b>Credit points</b>	5.2 ECTS
<b>Requirements according to the examination regulations</b>	Students should have attended all lectures and submitted all scheduled individual and group assignments prior to the final examination.

<b>Recommended prerequisites</b>	Students should have attended all lectures and submitted all scheduled individual and group assignments prior to the final examination.
<b>Program learning outcomes</b>	<p>PLO 2 Master advanced knowledge of classical physics and modern physics</p> <p>PLO 4. Able to develop learning aids by utilizing advanced information technology and the student environment.</p>

<b>Content</b>	<p><b>Students will learn about:</b></p> <p>This course will discuss the basic concepts of thermodynamics and their applications in physics and engineering, followed by a discussion of statistical mechanics and its applications in the current field of science and technology. Lectures will be held with a case-based learning approach. Mastery of this study will help students improve their knowledge, take other related scientific lectures, and develop themselves professionally in the field of physics education.</p>
<b>Forms of Assessment</b>	Assessment of the learning process follows the following components: attendance 5%; assignments and presentations 30%; mid-test 30%, and final-test 35%.
<b>Study and examination requirements</b>	<p><b>Study and examination requirements:</b></p> <ul style="list-style-type: none"> <li>- Students must attend 15 minutes before the class starts.</li> <li>- Students must switch off all electronic devices.</li> <li>- Students must inform the lecturer if they will not attend the class due to sickness, etc.</li> <li>- Students must submit all class assignments before the deadline.</li> <li>- Students must attend the exam to get final grade.</li> </ul> <p><b>Form of examination:</b> Forms of examination: Essay.</p>
<b>Media employed</b>	Powerpoint slides, simulation videos, learning management system (LMS), ZOOM application, and UNJ e-learning.
<b>Reading list</b>
